STATE TEACHERS COLLEGE

KIRKSVILLE, MISSOURI

PRESIDENT'S GREETINGS

A warm welcome awaits you at Missouri's State Teachers College. Many generations of students have enjoyed the hospitality of our campus.

Numerous visitors come to admire our beautiful campus and inspect our modern facilities. We hope you, too, will visit us. While our enrollment has nearly doubled in the past five years, our facilities have more than doubled. Thus, while growing rapidly we have been able to maintain our tradition of personal attention to our students.

We will soon be into our centennial ceremonies and hope you are with us.

Walter H. Ryle, President

THIS PUBLICATION . . .

This publication gives you a brief resume of opportunities available at Missouri's oldest Teachers College. A complete listing of courses, majors, and detailed information is available upon request. Primarily this College prepares teachers for the public schools of the state and nation. In addition to the B.S.ed., B.S., and A.B., the College offers the M.A. degree. Pre-professional training is offered in the fields of engineering, law, medicine, osteopathy, dentistry, and medical technology.

You need to know

Kirksville, Missouri 63501

Social, service, and professional organizations afford an opportunity for relief from classroom routine.

Forty organizations provide students an opportunity to participate in extra-curricular activities according to individual interests. The affairs of students are administered by an elected student council. This group sponsors many activities for the student body throughout the school year. These activities, which include receptions, dances, movies, and parties, are designed to provide entertainment for all students.

Dormitories provide accommodations for 2,250 students. Apartments for married students are available for 92 couples. It is advisable to apply early for accommodations.

The College operates four large dining rooms with a capacity for serving approximately 3000 students each meal. The Student Union will accommodate 600 per meal upon completion and additional dining facilities are programmed. Under the guidance of an expert food service director, tasty, well-balanced meals are provided in attractive and wholesome surroundings. Meals are served three times daily, seven days per week.

The major portion of your costs for attending college will be your expenses for housing and food. While it is difficult to state what each individual will spend, the costs for dormitory housing and food will be approximately \$560 for nine months. Tuition, fees, and books will add an estimated cost of \$240 for a grand total of \$800. (Out-of-state students inquire about non-resident fees.)

- ARTS AND CRAFTS, CERAMICS
- DESIGN, PAINTING AND SCULPTURE
ART FOR TEACHERS AND
FOR PLEASURE
- WOODWINDS, STRINGS,
PERCUSSION
- BAND—VOCAL, CHORUS,
ORCHESTRA
- MUSIC FOR TEACHERS, AND FOR
RECREATION

This College has long been noted for the excellence of its Fine Arts program. Many noted artists and musicians have attended college here and the demand for teachers in these fields cannot be met.

Missouri is the first state to sponsor a general education course at the secondary level embracing all the arts. The Teachers College offers a program of Allied Arts Certification with English, art, or music major, in addition to programs leading to degrees in Education and Arts.

A partial listing of courses, in addition to those offered in Allied Arts, includes: Arts and Crafts, General Crafts, Ceramics, Jewelry Making, Design, Drawing and Composition, Lettering and Poster, Drawing and Painting, Watercolor, Commercial Art, Sculpture, Oil Painting, Portrait and Figure Painting, History of Art, and courses in the Teaching of Art.

In addition to the degree of Bachelor of Science in Education, the College offers a wide range of musical oppor-

tunities including: Band, Chorus, the famed NEMO Singers, the Clarinet Choir which performed at the New York World's Fair, Operas, and the stringed ensembles. Private lessons are available for vocal and instrumental music. The "Marching 100" band performs at College events and goes on a spring tour each year.

CAREERS IN BUSINESS

- BUSINESS ADMINISTRATION
- ACCOUNTING
- BUSINESS EDUCATION
- SECRETARIAL TRAINING
- ADULT EDUCATION

The Business Education Division is housed in Violette Hall—the College's newest and most modern building. The division is especially proud of its record in placing students with various schools and businesses upon completion of their training at the Teachers College.

● Business Administration

If you desire a career in business, then Business Administration is the right field for you. Tomorrow's executives are today's administration students. You can be one!

Business firms need men and women with degrees in Business Administration more than ever before.

● Accounting

Are you the type of person who likes a challenge? If you are, a brilliant future is awaiting you in the field of accounting, and this College has one of the finest departments in the Midwest. Many fine positions will be available to you as a College graduate in accounting. You can work for a large accounting firm, private business, or a government agency. You could go still further and become a Certified Public Accountant and start your own practice.

● Business Education

If you are planning to become a teacher, then Business Education is a field for you to consider. It is in this program that students of today are molded for business teachers of tomorrow. With experience in short-

hand, business law, accounting, economics, typing, office appliances, and other courses, you will be prepared to teach in high school, anywhere—you get a lifetime teaching certificate for the State of Missouri.

● Secretarial Training

The Teachers College has an excellent secretarial program with all the advantages and excitement of a large college. At the end of your training you receive a certificate of completion from the Business Education Division. (A college certificate opens many doors for you.)

● Adult Education

Northeast Missouri State Teachers College Adult Education Program provides business and secretarial courses for non-college students.

- **TEACHING . . . A REWARDING EXPERIENCE**
- **A TEACHER IS A PROFESSIONAL**
- **LEARNING TO BE AN ADMINISTRATOR**
- **SPECIAL FIELDS AVAILABLE**

- **"Where teaching is the greatest art."**

This is the motto of MSTC. Since its origin in 1867, the College has been developing young men and women into teachers and administrators for the public schools of our country.

- **Higher academic standing.**

In the Division of Education, which includes both secondary and elementary, the student who pursues this field must realize that he is required to maintain an above average grade to receive the teaching certificate.

- **Postgraduate study at MSTC**

MSTC offers the Master of Arts degree in many fields. Fellowships are available to students who desire financial aid to complete graduate studies.

- **Preparation for the teaching field.**

After a successful completion of the general and required courses, a student in the Education field is sent to schools to observe and to do actual classroom teaching. This gives each student an opportunity to learn the accepted and desirable methods and to develop skills in teaching.

- **Individual development.**

The student in the field of education is presented with a thorough acquaintance of children and youth. He is given a better understanding of the sociological, physiological and psychological factors that determine the development of children.

- **Administrative positions.**

The student whose primary interest in the field of Education lies in the

administrative position, is taught the basic knowledge of agencies involved in the place and manner in which education occurs, methods in coordinating school and non-school culture and understanding the problems of community life as they relate to curricula and general administrative arrangements in the public schools.

- **Bachelor of Science in Education**

After graduating with the Education degree, the individual is recognized as a professional teacher in all states across the country. Alumni of MSTC can be found in every state and in other countries. MSTC is proud of its teacher placement record. We have been able to place every student who desires a teaching position.

MATHEMATICS
EDUCATION IN MATHEMATICS FOR . . .

- **FLAT SURFACE AGE**
- **SPHEROIDAL AGE**
- **SPACE AGE**

CAREERS IN . . .

- **TEACHING**
- **BUSINESS**
- **INDUSTRY**
- **GOVERNMENT**

The explosive development of mathematical ideas and their practical application has opened a wide variety of careers for mathematicians. In nearly every field of human endeavor, mathematics plays an important role. Even our biggest computers at work on vastly complicated analyses must be fed information based on mathematical formulae developed by human brains. Here are some problems for mathematicians to solve:

1. Can the difference between a nuclear explosion and an earthquake be detected from a distance of 10,000 miles?
2. How is the proportion of college graduates who become teachers affected by salary increases?
3. How much, if any, does smoking increase the occurrence of lung cancer?
4. Show that the wind cannot blow everywhere over the earth's surface at once; there must be a point of calm.

Mathematicians are needed . . .

In teaching—tomorrow's minds must keep pace with expanding technology.

In business—bookkeeping, accounting and management, demand a basic knowledge of mathematics.

In finance—the monetary systems of the world are based on mathematical principles.

In government—some of the country's greatest mathematicians are employed by the government in the Space Program and the Department of Agriculture.

The Division of Practical Arts ties together the three fields of Agriculture, Horticulture and Industrial Education. It offers majors which prepare teachers through the Bachelor of Science in Education Degree in Agriculture and Industrial Education. The division offers numerous courses in woodworking, metal working, welding, drafting, applied electricity and radio, photography, ceramics, plastics, leathercrafts and driver and safety education. The Agriculture Club is a social-professional organization, within the Division of Practical Arts. The purpose of the club is to create interest in agriculture and the teaching of agriculture as a vocation. Many activities have been undertaken by this organization through the years, and one of the big annual projects is the conducting of contests for FFA students of Northeast Missouri.

"Handy men around the campus" describes the Industrial Arts Club, which performs numerous services for the College during each year. Another prominent feature of the IA Club, is often winning the first place trophy in the Mechanical Division of the annual Homecoming Parade. The IA Club is a social-professional organization and seeks to provide instructive programs and to encourage advancement in the industrial education field. Climaxing the year's work, each member looks forward to the annual spring visit to large industrial centers and to touring various factories and plants.

and four social sororities, all of which are nationally recognized, add a definite ties on the campus.

SOCIAL SCIENCE

One of the larger academic divisions of the Teachers College Campus is the Division of Social Science, offering a variety of majors and fields of study. More than 150 courses are taught in the Division by an outstanding faculty. Most of the Division classes are taught in the newly remodeled Laughlin Hall which offers modern classrooms, seminar rooms, and faculty offices. The social sciences are designed to give an understanding of the structure and importance of society and social institutions and their dynamic changes through the world's history.

- Social Science
- Economics
- Geography
- American History
- Asiatic History
- World History
- International Relations
- Philosophy
- Political Science
- Psychology
- Religious Education
- Sociology
- Latin American Studies

A social-professional organization within the Division is the Historical Society, which is distinguished in being the oldest campus organization. The Society strives to provide each member with informative material designed to supplement their knowledge and interest in history through programs featuring speakers, films and panel discussions. The group also takes an annual excursion to a location of historical interest. All students interested in the field of history are invited to membership in the Society.

A new organization within the Division is the Pre-Law Club, established in 1961. The club features spirited discussions of various topics and benefits from a number of guest speakers invited to the campus under a sponsorship. Members also participate in the Inter-Collegiate State Legislature which is held in Jefferson City early each May.

Supervised by an experienced staff of instructors, coeds are given actual laboratory work.

A popular major with many of the Teachers College coeds is Vocational Home Economics, providing an excellent future in the teaching profession along with a practical background in the field of home economics. The Division of Home Economics occupies its new quarters in Violette Hall, providing the most modern equipment available for classrooms and laboratory instruction. Each home economics major spends one quarter living in the beautiful Home Management House and is responsible for various phases of managing the operation of the home.

Many courses in cooking, home management, sewing and clothing problems are available to the home economics major as well as other students interested in elective courses in this field.

Colhecon Club is an active organization on the campus for students interested in professional economics and homemaking. Colhecon strives to promote the professional benefits of a home economics career. Monthly activities of a social and professional nature are sponsored by the group during the academic year. "The reward for a job well done is having done it" is the motto of Colhecon.

Modern instructional methods are employed in the teaching of foreign languages. Shown here is a student listening to a foreign language tape.

In today's high-speed society, the art of effective, accurate, oral, and written communication becomes imperative. As the boundaries of the world come closer together, the ability to speak more than one language becomes the mark of an educated person. These requirements have not lessened the need for a thorough understanding of man's recorded experience as revealed through the literary giants of the past. The language barrier in the world is becoming extinct. Here at the State Teachers College a student is given an opportunity to participate in every phase of the language arts. More than 150 courses are taught in this division alone. These courses embrace nearly every facet of the world of language and literature.

• **English:** The effective use of English is a must for the successful person regardless of his profession or activity. A wide variety of course offerings insures that each student is afforded a chance to learn to communicate properly and to interpret and understand what others are saying.

Extensive facilities are available in the areas of Speech Correction. Not only is the individual with speech difficulties helped, but a complete course is offered for those who choose a career in this increasingly important field.

• **Publications:** For those interested in Newswriting or the field of Journalism, theory and experience are blended into a common effort in producing the College newspaper and publication of the yearbook, "The Echo".

"The play's the thing. . . ."

LIBRARIES
AND MUSEUMS

The library fulfills the needs of the most serious research student as well as the casual reader looking for hometown news. The thousands of volumes have been especially selected to support those courses offered by the College. In addition to the regular reference books, the College has an extensive collection of bound magazines, newspapers, and periodicals. The library is being expanded by a large addition which will provide much more space for study, research, browsing, and recreational reading. The new library addition will have a General Reading Room seating more than 1000 students and smaller reading rooms will be located throughout the stack area. A unique feature of the new addition will be the Rare Books Room.

An appreciation of the past is provided by the museum located in Kirk Memorial. Thousands of items of historical interest have been preserved and are on display. The archives provide a repository for pictures, articles, clippings, letters, and other memorabilia associated with the history of the College and northeast Missouri.

Today's high-speed technological developments have placed increasing emphasis on scientifically trained men and women. Likewise the demand for qualified science teachers is greatly accelerated. The Science Hall shown above will soon be expanded to meet the growing demand for scientific training. Could science be for you?

Course offerings include preparation for the Bachelor of Science Degree with the following majors: General Science, Chemistry, Physics, Zoology, Botany, and Master of Arts Degree in General Science Education.

• Pre-Professional

By arrangement with other colleges a curriculum may be followed which will satisfy entrance requirements in the field of Dentistry, Engineering, Medicine, Osteopathy, Law, Medical Technology and other professional schools.

A partial listing of courses include: Biology, Zoology, Botany, Comparative Anatomy, Entomology, Game and Fish Management, Forestry, Heredity and Genetics, Bacteriology, Embryology, Microtechnique, Wildlife Conservation, Histology, Vertebrates, Plant Taxonomy, Bioecology, Limnology, Glassblowing, Biochemistry, Organic and Physical Chemistry, Astronomy, Physical Geography, Geology, Meteorology, Radiation Science, Physics, Light, Heat, Atomic Physics, Nuclear Physics, Classical Mechanics, Hydrodynamics, and related subjects.

FOR MEN

- Intercollegiate Sports

Archers take aim on major in Women's Physical Education! Getting set for another throw!

The K-Dettes, an exciting drill team, and the College Cheerleaders, provide leadership and enthusiasm during athletic competition. Both groups are chosen on an individual tryout basis.

The College Bulldogs live up to their nickname and are noted for their tenacity and determination. Beginning in 1959, they have won the conference All Sports Championship each year. This reflects the College goal of successful participation in all sports rather than concentration on selected sports. The sports program is designed to enhance the objectives of the Health and Physical Education Division and to provide leadership opportunities in the ever-expanding fields of recreation.

• **Varsity Competition:** Football, Basketball, Baseball, Cross Country, Tennis, Track, Golf and Wrestling.

• **Intramural:** Tennis, Volleyball, Fleetball, Basketball, Table Tennis, Badminton, Wrestling, Softball, Bowling and Horseshoes.

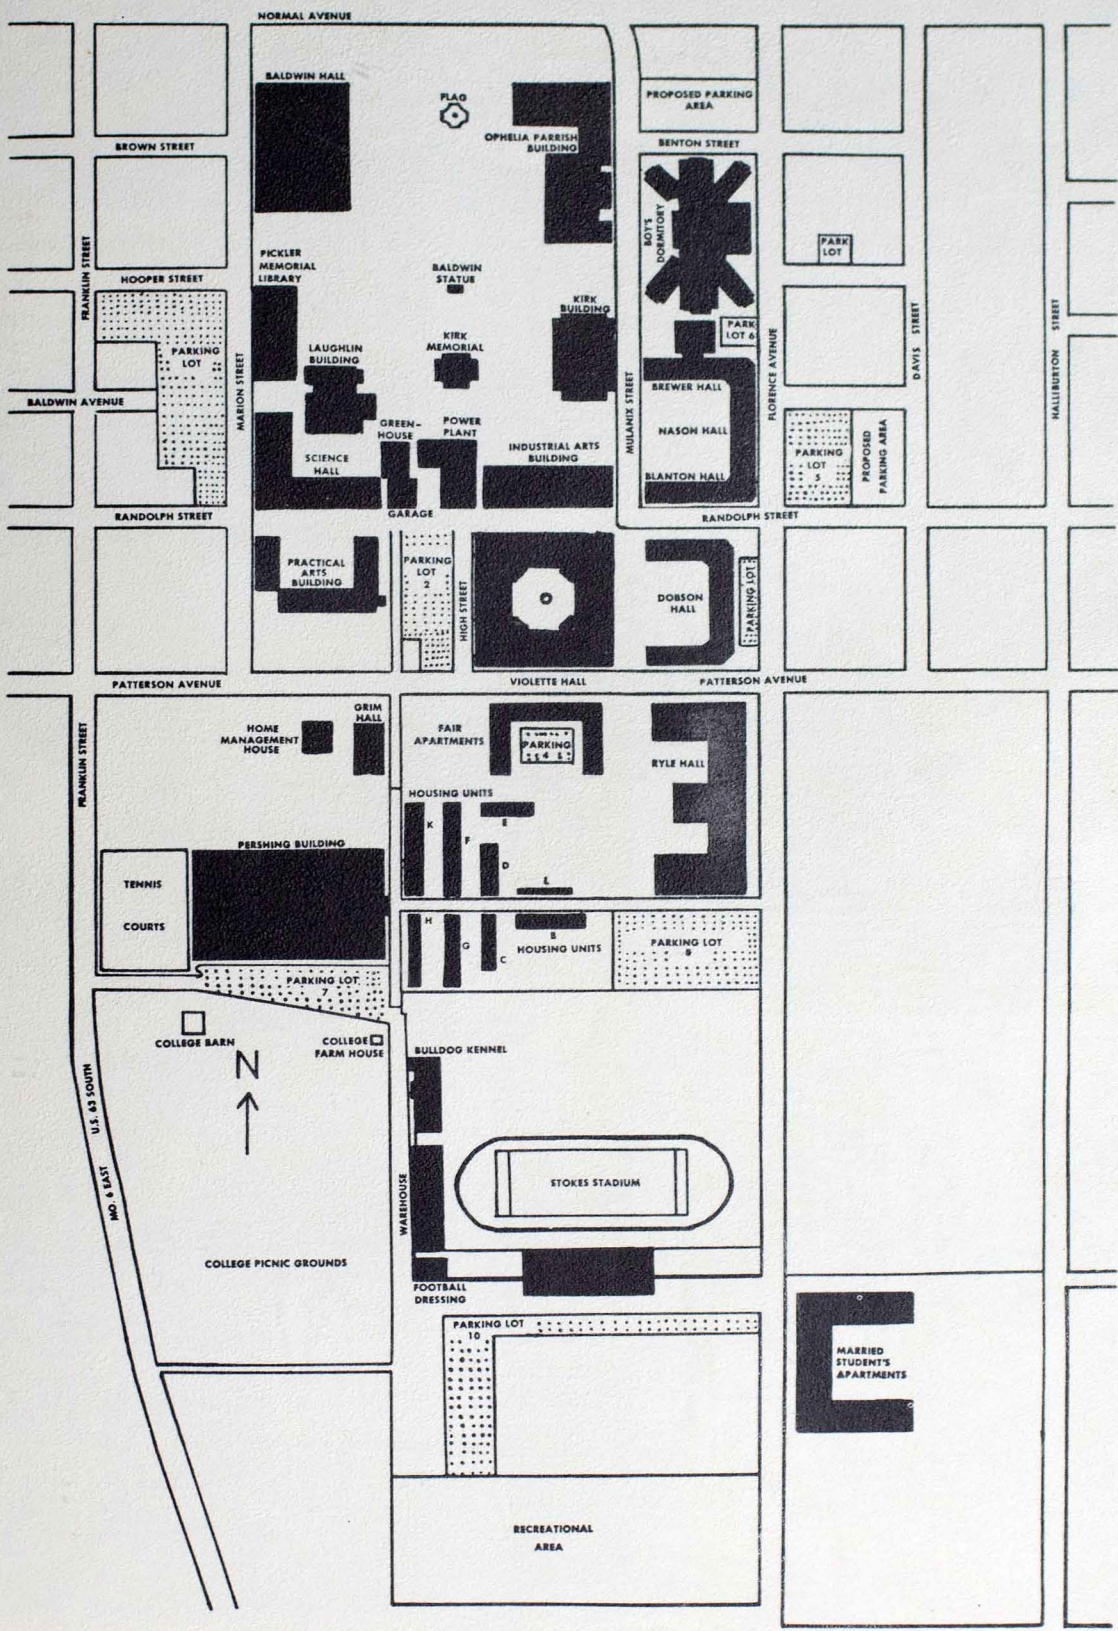

• **Degrees Offered:** Nursing Major, B.S. or B.S.ed.; Physical Education Major, B.S.ed. and M.A.; Recreational Leadership Major, B.S.ed.

NURSING EDUCATION

Nursing is one of the most exciting, rewarding and demanding professions a young person can choose. A nurse has the opportunity to learn how to help the sick and give counsel for health. Nurses work in cooperation with doctors, dentists, dietitians, social workers and others to help people grasp that precious thing called health. The Nursing Education program on the Teachers College campus prepares professional nurses to serve the expanding needs of humanity in health and disease education. Today there are unlimited opportunities for a well-qualified nurse whether it be in hospitals, public health agencies, industry, schools, health education or teaching nursing.

The Nursing Program is accredited by the Missouri State Board of Nursing. The graduate will have a Bachelor of Science Degree, nursing major, and will be permitted to take the state examination for registration, (R.N.). The College has complete jurisdiction of the program of education for professional nursing which includes methods and hours of instruction, clinical assignment, supervision and evaluation of the students by the nursing faculty. The various hospitals in the Kirksville area and their associated clinics, provide experience in all institutional nursing services. A graduate of this program is prepared for staff nursing and is also eligible for post-graduate study.
