President's comments

Charles J. McClain,

Times change, attitudes change, people change. However, Northeast Missouri State University is still loyal to basic traditions, traditions which you as alumni were instrumental in establishing during your days at Kirksville Normal School, Kirksville State Teachers College, or whatever our name happened to be at the time. We now value the name of "State University" but our roots can still be traced beyond our name change. I think that is the way you want it to be; I hope so.

Loyalty to our illustrious past does not negate our plans for the future. A tour of your alma mater reveals significant change, change that was necessary to insure that our keystone — excellence — remains our utmost goal. Two major changes in the physical environment have occurred during this past school year: an Olympic-size swimming pool is in the construction phase, and the site for a new administration/classroom building is being prepared.

More and more students are attracted to our University, despite the fact that the national trend in enrollment has stabilized. Our freshman enrollment has increased 10 percent to 1450 this year. Besides having more students attend Northeast, we have a higher standard of students enrolled. On recent measurements our students rated higher than the national norms for graduates throughout the country. We are very proud of this achievement.

The concept of "value added" intrigues me. It propounds that a measure be taken of each student's learning at the start of a program, another measure be taken at the end of the program, and an estimate be made of the amount of improvement.

The history of Northeast Missouri State University (Northeast Missouri State College, Northeast Missouri State Teachers College, First District Normal School, North Missouri Normal School and Commercial College) is not well told in an account of its formal structure. The adaptation of governing structures to changing problems and increasing complexity testifies to the flexibility of the University's formal structure and to the strength of the unwritten structure. For this structure to have been effective for more than a century, the dedication, competence, integrity and mutual trust of the persons working within have had to be considerable. These qualities are indeed much celebrated among all those who make these organization forms work.

Any university of this size constantly changes its membership. Faculty and staff who have given many years leave active service because of death or retirement. New members are inducted into service of the University. The challenge of carrying forward the great work started by so many talented persons who have served this University will indeed be a formidable one.

We need the active help and counsel of the more than 22,000 alumni as we look forward to the future with hope and promise.

So often because of our daily chores around the University, we forget to thank the people who in many ways have helped to make the program at Northeast a truly outstanding one, much less tell the alumni about them. I'm speaking of our elected state-wide officials and the members of the general assembly.

In the report included in this issue we hope to tell you who these people are and secondly some of the things which they have helped us to do through general revenue appropriations.

I hope you as an alumnus will find the report of interest and should you have any questions, feel free to write or call my office.

Best Personal Regards,

Charles J. McClain

Editors' Note

"Colleges face retrenchment," "Universities hard hit by drops." Similar headlines can be seen in prestigious newspapers and reliable magazines, publications that inform us of declining enrollments in institutions throughout the country.

Contrary to this reported trend NMSU has had a larger number of freshmen each year for the past several years. Obviously, the causes cannot be traced to a single factor. But the primary contribution to helping high school students and their parents learn about the advantages of NMSU has been the work of the admissions staff. A story concerning Terry Taylor, director of admissions, and Jim Grossman and Mary Harrington, his two cohorts begins on page 17.

With a change in the number of students NMSU has modified programs which students no longer find attractive and has developed methods which stress participation in non-classroom activities as a supplement to lectures and tests. One of these programs has been the Home Management House. Here, home economics majors learn the experiences, problems, and headaches of running a household. The story of what students do when faced with restricted budgets starts on page 29.

Another program which has gone out of classrooms, out of buildings and, at times, out of town is the Reserved Officers Training Corps. Switching to an expectation that students will develop self-discipline when given basic instructional guidelines has manifested the teaching of a variety of outdoors activities such as mountaineering, orienteering and rappelling. And these activities have caused students to enroll in the military science program at a furious pace. A report from Patty Byrum, a senior in sociology from Shelbyville, begins on page 22.

Photography, a discipline within the practical arts division, which now has 138 students enrolled in four courses has also been popular. An outgrowth of this popularity was the feeling among many photography students that there should be an outlet that would allow students to show their work. In early March, the publications office and Student Senate sponsored a contest and exhibition for student work. The photos on pages 25-28 represent those rated as the finest by a panel of the judges from the Photographic Society of America.

Do you know the name of the legislator who represents you and your district's interests? Do you know the legislator who represents the interests of NMSU? Our political system demands that each individual join with other individuals of similar interests to express views through their elected officials. Often, individuals don't realize that legislators were elected to represent their interests. Often we simply find ourselves too busy to investigate which legislators can best express our views through the legislative process.

Realizing this the Nemoscope has included an eight page report that tells which elected officials represent the Northeast area, what districts these elected officials represent, and which elected officials sit on the committee that determines the amount of funds NMSU receives.

This report has been included as an insert which can be removed by simply bending back the binding staples. The editors hope you will take it out, keep it handy for ready information on legislators, and, perhaps, pass it along to your friends.

The Editors

Letters

Dear Editor:

The article in the Fall 1974 *Nemoscope* regarding the Coordinating Board for Higher Education was, I thought, a thoughtful analysis of the background and members of the Board. There are, however, some concerns I have about the presentation of the history and future of the Board as they pertain to state government reorganization and my appointments to the Board.

The people of Missouri approved a constitutional amendment in 1972 establishing the Coordinating Board as the head of the Department of Higher Education within the Executive Branch, effective July 1, 1974. Then, during the two-year process of enacting the reorganization statute (to implement the constitutional amendment), the General Assembly and I agreed on the need to create a strong board, through law, to carry out long-range higher education planning and to attempt to eliminate unnecessary competition and duplication among our colleges and universities.

The people I have appointed to the Board are of the highest caliber, as the article shows. It is perhaps ironic that the Missouri Senate Gubernatorial Appointments Committee was reluctant to approve one of my appointments, Bill McCalpin, a prominent St. Louis attorney, because he appeared to them to be too highly qualified and too strong a leader.

During these times of extremely tight budgets at the state level, strong leadership in the field of higher education coordination is essential. I cite as one example the concerns the Coordinating Board has expressed that development of a new and expensive School of Optometry at the University of Missouri-St. Louis could rob other higher education institutions of badly needed resources, and that the school has been proposed without relationship to the overall needs of the University or higher education.

It is precisely this kind of courageous, yet difficult stand which the Coordinating Board must be prepared to take whenever necessary to preserve a balanced higher education picture in Missouri. I hope all Missourians join me in supporting this Board on a job well done in the few months it has existed.

Christopher S. Bond
Governor

Dear Mr. Harrison:

This is to thank you for your note of March 21 and to say I have read the latest edition of *Nemoscope* cover to cover and I will forgive you for omitting anything at all about the class of '24.

Further, I wish to state the latest edition honors my beloved professor, Eugene M. Fair — which just goes to show he was a man of vision and progressive ideas altho he worked against odds in his day. Oh, how I recall how he had to work in the Legislature to get even part of what K.S.T.C. deserved. I still have one of my term papers on which he scribbled some encouragement to me, personally, despite the hundreds of pages of such things he had to scan and grade. It came to light when I was packing to move two years ago.

Again, I wish to thank you and all who made the reunion of the class of '24 a memorable event. Particularly do I again wish to thank you for your thoughtfulness of my husband.

Xena E. Johnson '24
Marionville, Missouri

Please excuse our tardiness, see page 14.

Dear Mr. Harrison:

I was happy to receive the Fall-Winter (1975) issue of the *Nemoscope*. An excellent publication; I like it, and I am pleased with the progress of NMSU. I cherish my days at Northeast. If I might be of any help, just call.

Dr. D'Souza, NMSU geography professor, dies

Dr. Anthony D'Souza

Dr. Anthony Cajetan D'Souza, 59, associate professor of geography, died February 6 in a Kirksville hospital, where he had been a patient since late January.

Born in Calcutta, West Bengal, India, on June 14, 1915, he was the son of Albert and Maria Augusta Heredia D'Souza. Dr. D'Souza attended the University of Calcutta, India, where he received his B.A. honors in geography in 1938 and 1942. His minor fields included economics, history and English. In 1943 he received his Bachelor of Teaching Degree from the University of Calcutta with major fields in methodology in geography and history. He continued at the Uni-

versity of Calcutta where he received his Master of Arts in geography in 1944 with a major field in economic, regional and lab practical. In 1951 he received his Masters of Arts in education from the University of Calcutta with major fields in comparative education and methodology in social science. In 1961 he received a Professional certificate in geography-education from the Ohio University in Athens, Ohio, and in 1971 received his Ph.D. degree in geographic education from Calcutta University.

His honorary degrees and awards included: J.M. Senior Research Scholar in Geographic Education, Calcutta University; Graduate Study, Trinity College of Music in London; Fellow of the Royal Geographical Society in London; Fellow of the Geographical Society of India; Smith-Mundt and Fulbright Scholar and Certificate in Geography-Education at Ohio University.

Dr. D'Souza observed the education system of the United States under the Smith-Mundt and Fulbright programs in 1961-62, and was assigned to Ohio University, Athens, and the San Diego County Schools in California. He also observed the education system of England on invitation from the British Council, England, 1962; the education system of France on an invitation from the French Ministry of Cultural Affairs, Paris, 1962; and the education system of Japan on invitation from the Japanese Ministry of Education, Tokyo, 1967.

He observed the working of the East-West Center, Honolulu, University of Hawaii, on invitation from the East-West Center, 1967. As a tourist, he had visited the Middle East, Egypt, Somali, Italy, Switzerland, West Germany, France, Holland, Canada, Mexico, Hong Kong, Singapore, Malaysia and Thailand.

On June 1, 1968, he joined the faculty of NMSU where he was associate professor of geography at the time of his death. Before coming to Kirksville he was employed in the United States Office of Education and State Department in Columbia from August 1967 until June 1968. From August 1966 until June 1967 he was in the United States Department in Alexandria, Va. He was also employed at St. Xavier's College of Calcutta University in Calcutta, India, as professor of geography and education.

Dr. D'Souza was a member of the West Bengal University and College Professors' Association, India; Indo-American Society, India; a life member, Catholic Association of Bengal, India; Association of American Geographers, Washington, D.C.; International Council on Education for Teaching, Washington, D.C.; American Association of University Professors, Washington, D.C.; Northeast Missouri State University Community Teachers' Association; Missouri Council for Geographic Education; Missouri Academy of Science; Sinfonia Music Fraternity of America;

and Association for Asian Studies, Ann Arbor, Michigan. He was also a member of Kiwanis International in Kirksville.

Dr. D'Souza studied Music Theory at the Trinity College of Music in London. He served as organist for the Catholic Church for 40 years.

His publications included "The Geography of West Bengal" (Macmillan); "Indian Sub-Continent" (Orient Longmann); "How People Live in India," a supplementary reading material for the American school system (Publishers: Beckley-Cardy, Chicago); and "World Regional Geography" (Macmillan).

Surviving are his wife, Irene Azavedo D'Souza; five sons, Dr. Tony D'Souza, Jr. of Columbia; Arthur D'Souza of Toronto, Canada; Alfred D'Souza and Alan D'Souza, both of Chicago, Illinois; and Austin D'Souza of the home; and one daughter, Anita D'Souza of the home.

He was preceded in death by one daughter, Arlene Angela D'Souza on June 29, 1971. ●

Pickler Memorial joins catalog system

Pickler Memorial Library has become the first academic library to independently join the Ohio College Library Center (OCLC), a cataloging system which allows libraries to search for materials by computer.

Begun in 1971, the OCLC links more than 300 colleges and universities through a common classification system. Until recently, the OCLC accepted only consortiums of libraries for membership.

A video display terminal links the NMSU library to the central band of information in Ohio. This mechanism, which consists of a television screen attached to a typewriter, shows the operator the information being typed. While the typewritten request is being keyboarded into the mechanism, the request is channeled to Ohio through telephone lines.

Because Pickler Memorial is linked to the catalogs of many oth-

er libraries, the librarians at NMSU can determine whether the material needed is available in other libraries. If so, the material is requested from the appropriate library and mailed to Pickler Memorial.

The primary advantages of OCLC for the NMSU library involves the future, according to George Hartje, library director.

"The biggest benefit is not the immediacy," said Hartje. "What you're doing is building a data base for use.

"For years, Missouri libraries have been talking about borrowing material from each other. By cataloging material, you're building a data base that some time in the near future everyone can plug into."

Pickler Memorial is the first public supported institution in Missouri to become a member of the library center. ●

2 Danish students attending NMSU

by Cindy L. Bell

For several years NMSU has hosted foreign students. This semester 155 foreign students, representing 31 countries, are enrolled here. Among these are two Danish students.

A few years ago a request came from the administration to increase the Western European student enrollment at NMSU. Dr. Walter H. Ryle, president emeritus, sought the assistance of Dr. Harold Mickelson, business division, to contact students in Denmark.

Because of Dr. Mickelson's Danish background and interest in the foreign student program, he has written and brought six Danish students to NMSU in the last 10 years.

Last year he wrote 16 letters to students in Denmark. Lisbeth Kock and Niels Madsen replied and enrolled last fall.

Lisbeth, enrolled as a senior, studied American literature and composition before she returned to the University of Copenhagen in Denmark. She took her final examinations in February and will receive her degree in English in the

spring of 1975.

Lisbeth is not the first member of her family to attend NMSU. In 1965, when Dr. Mickelson began contacting Danish students, Lisbeth's sister Hanne came to NMSU for a year. During that time Hanne met Ulrich Raedecker from Germany, who attended NMSU for a year, and later married him.

Niels Madsen studies English and French on the undergraduate level. However, he said the credits he receives for what he takes at NMSU will not transfer to his transcripts in Denmark. Dr. Mickelson explained this is due to the difference in the educational systems as Denmark does not measure courses in semesters.

Niels played drums in the University Percussion Ensemble and Concert Band. He performed at and saw his first American football game last fall as part of the NMSU Marching 100 plus.

"As a professional musician, he played drums in a small band in various parts of Scandinavia. He plays the piano and clarinet also,"

Niels Madsen

Dr. Mickelson said of Niels.

In September Madsen will return to the University of Copenhagen where he will study English for six to eight years, and then French for another two or three years. After he graduates, Niels hopes to be an interpreter or a teacher. ●

Graduate program gives counseling

by Maggie Jarrett

Hezz Harrington

"You're real nice to stay and talk with me this way. Not many people would, you know."

Similar words of appreciation are often heard at Kirksville's Grim-Smith Hospital as a result of a new patient counseling program under the supervision of Dr. James S. Bailey, a counseling psychologist on the faculty of Northeast Missouri State University, and Dr. Barry W. Gushleff, medical director at the hospital. Simply, the program works like a two-way street. It brings together patients who need help and students who need experience in helping.

As part of the requirements for the master of arts degree in guidance and counseling, University students are spending several hours per week offering non-structured, non-medical counseling to Grim-Smith patients who request their help. Their counseling can take many forms: helping a patient accept terminal illness; lending a sympathetic ear to a lonely and depressed patient during a long hospitalization; cheering up someone who is having a "blue" day. Whatever the situation, the student's goal is to form a "helping relationship" with his patient.

Patients who might benefit from having someone to talk with are referred to the counseling students by the hospital staff. The students do their visiting from mid-afternoon to mid-evening so the regular

daytime hospital schedule is not interrupted. They wear an identification badge while in the hospital; Bailey hopes to have the student wearing some type of uniform in the future.

Usually a student will continue to visit a particular patient until the patient is dismissed from the hospital or decides that he does not want to see his counselor again. If a patient wants to continue the counseling relationship after he returns home he can make individual arrangements with a student.

Harold "Hezz" Harrington, one of six student counselors on duty at the hospital this semester, sees the counselor's role as "someone who can sit and talk with a patient for more than three or four minutes at a time. The nursing and medical staff are usually too busy caring for their patients' physical needs to 'just sit and talk.' I think we are needed most by patients who don't have many regular visitors."

Harrington, 24 and married, is typical of his colleagues. He is an NMSU graduate of May, 1974, with a teaching certificate in history. After completing his student teaching he felt that he "just wasn't helping people enough." Realizing that he had the "big brother image . . . it's always been easy for people to talk to me" he decided to pursue a career in counseling. He hopes someday to have his own practice.

Bailey meets weekly with the

students for an open-ended discussion of their counseling experiences. If a student comes upon a problem he feels inadequate to handle, Bailey, Dr. Robert Wright, director of the University's counseling program, or another staff member will intervene. The University counseling department is on 24 hour call at the hospital in case of emergencies.

"The students are treated as professionals by our faculty and the hospital staff. After each counseling session the student is expected to write a synopsis of what went on. This information is included as part of a patient's hospital chart," Bailey said.

Bailey noted that the counseling and guidance field traditionally has been associated with a school setting. Today's counselors are being employed in parole and probation offices and prisons, in social service organizations, rehabilitation offices, employment services, hospitals and many other settings where counseling skills are seen as advantageous.

"By initiating new programs into our curriculum, such as patient counseling, we are attempting to prepare our students to be confident in a variety of situations," he said.

"The program at Grim-Smith was set up last summer as a pilot program. It's proven so successful both from the standpoint of the patient and the student that it is now an integral part of our degree program." ●

Team of accounting students place in business game

A team of accounting majors from NMSU placed high in the rankings in the Intercollegiate Business Game. Mark Phillips, a senior from Montezuma, Iowa; Sharon Collins, a senior from Mendon; Allen Ehret, a sophomore from Eldon, Iowa; and David Shively, a sophomore from Coatesville, competed against students from 26 other colleges and universities in the competition conducted by the

Graduate Business Association of Emory University in Atlanta, Georgia.

Begun in 1965, the IBG attempts to acquaint students with decision-making methods by constructing simulated business problems that the students must solve. The students receive a set of statistics concerning the capabilities, limitations and resources of a dummy corporation and the corporation's

competitors. The teams of students compete against each other in attempting to use the resources to maximize profits for the company.

This year, the students received an outline of a corporation that manufactures and markets pocket calculators and digital clocks. Faced with price wars, recessions and other exigencies, the students teletyped their management decisions to a computer at Emory University which analyzed the decisions. The computer then printed out the consequences of each team's decisions, complete with updated income statements and balance sheets.

Last January, the game began and the NMSU students received their instructions.

"Our students' strategy was to avoid the price cutting as much as possible and to provide the consumer with products of quality. They put emphasis on advertising and personal selling with hopes of becoming more profitable in the future," said James Edwards, NMSU assistant professor of accounting.

Twice a week, for six weeks, the students teletyped their decisions to the computer in Atlanta. This time period represented a simulated time period of three years.

At the end of the six weeks, the students gave a presentation for a panel of judges in Atlanta. The judges then examined the earnings, stability, long term growth, and other aspects of the company as each team had managed it. Based on these figures, an annual report for the theoretical second year the company operated, and the quality of the presentation itself, the judges decided which team had performed in the best manner.

In retrospect, Edwards stressed the students' learning during participation in the game.

"The students tend to be overspecialized in the area of accounting and the game caused them to see that it is much, much more than accounting," Edwards said. "It caused them to get involved in marketing, in production, in finance. It related them to all the functions of a business." ●

Becky May returns from Germany

by Maggie Jarrett

Becky May (left) receives homecoming gift from Mrs. Trude Lear.

Becky May, a junior majoring in sociology, returned recently from a 10-month overseas study internship in Cologne, West Germany. She is the daughter of Mr. and Mrs. Bert May of St. Louis.

While in Germany, Becky lived with Dr. and Mrs. Volker Hauff and their two sons, sharing in their daily lives, adult family responsibilities and recreational activities. Dr. Hauff is the State Secretary of the Parliament for Research and Technology and the Representative of Esslingen in the German Bundestag, the federal assembly. As a traveling companion to Dr. Hauff on several business trips, Becky met many German political leaders and became familiar with the organization and workings of the German Bundestag located in Bonn.

In addition to practical language learning in the Hauff household, Becky attended formal language classes at the Benedict Language School in Cologne. Throughout the 10-month visit she maintained regular contact with Mrs. Trude Lear, German instructor at NMSU, through correspondence and extensive reports on her activities. Mrs. Lear visited Becky during the sum-

mer while teaching English at the Humanistic School in Ettal, Germany.

During July, Becky traveled to Amsterdam, Delft and Den Haag, Holland, and Florence and Rome, Italy. Becky's mother, Mrs. Virginia May, spent four weeks with Becky in November and they traveled by train to Esslingen, Berlin, Frieberg and Munich, Germany, and to Zurich, Switzerland. Becky's brother, Robert May of St. Louis, visited her in September.

"German people were very open and interested in me and my American background. Once I had enough self-confidence to talk to them and ignore my language mistakes, I got to know them better and found them very cordial," Becky said.

About her internship, she said, "I think every student should have an opportunity to go through something like this. Not only did I learn how to meet strange situations and people with a positive attitude, but I also discovered attitudes and feelings in myself which I never knew existed."

She hopes to return to Germany for further studies after graduation. ●

Richard St. Clair, professor emeritus, dies

Richard St. Clair

Richard St. Clair, 67, of Kahoka, died January 25 in the University of Missouri Medical Center in Columbia, where he had been a patient since early December. He had been in failing health for some time.

Mr. St. Clair received his undergraduate degree from Northeast Missouri State University in 1933, his Master's degree from the University of Missouri in 1939 and did post-graduate work at the University of Southern California.

He started his teaching career in the Lewis county schools in 1925 and retired from NMSU in 1972 as associate professor of education af-

ter nearly 25 years of service. Mr. St. Clair was honored with emeritus status at the summer commencement in 1973.

During his years in the education field, Mr. St. Clair was county superintendent of the Kahoka High School; Elementary principal at Palm City, California, and served as fieldman for NMSU 1947-49. At the time of his retirement he had nearly 50 years of teaching experience at college and secondary levels.

Mr. St. Clair was a member of the board of the Kahoka State Bank. He was a member of Phi Delta Kappa, national men's education honorary fraternity. He was also a member of the St. Paul United Church of Christ in Kahoka.

Born in Wyaconda February 6, 1907, he was the son of John and Estaline McCarty St. Clair. On May 27, 1930, he married Garnett McNally who survives. Also surviving are, one daughter, Mrs. Claus (Wanda) Hoffman of Ft. Collins, Colorado; two grandchildren, Bobbie and Lisa; four brothers, Willie St. Clair and John St. Clair, both of Kahoka; Charley St. Clair of Keokuk, Iowa; and Elmer St. Clair of Williamstown; and two sisters, Mrs. Martin (Gertrude) Webster of Kahoka, and Mrs. Glen (Opel) Priebe of Farmington, Iowa.

He was preceded in death by one sister, Elsie Webster, and three half-sisters. ●

to give the information required by the state and federal government.

For the project, students studied the IRS manual on income tax and attended special work sessions aimed at preparing them to handle the nuances of the IRS forms. After completion of the sessions, the students became qualified tax assistants, enabling them to give valuable advice on completing tax forms without omitting information or committing errors.

C. Dwayne Shoemaker, assistant professor of accounting stressed the benefits of VITA. "From the University's standpoint, the project served a dual purpose, giving the students practical experience they cannot gain in the classroom, while providing a valuable community service." ●

Science program teaches learning of environments

by Cindy L. Bell

For four summers NMSU has been the center of environmental science teaching. During this time the Missouri Environmental Studies Approach (MESA) produced 522 environmental studies teachers. NMSU is the only institution in the United States that trains teachers who go immediately to the students. The others train instructors of the program, said Dr. Dean Rosebery, head of science division and director of MESA.

The main focus of the program is to establish pleasant, low-threat environments conducive to learning for people of all ages. MESA follows the psychological principles of Abraham Maslow and Carl Rogers, and deals with the interaction of several environments.

One is within the individual. It includes feelings, emotions and attitudes. Another is the immediate physical surroundings which focuses on the earth. "It's more of a self-actualization program," Dr. Rosebery said, "teaching the students to develop their own decisions about their environments."

The Environmental Studies ma-

Accounting club helps area families with tax returns

In cooperative effort between the University accounting club and the Internal Revenue Service, more than 50 NMSU students helped senior citizens and low income families prepare their tax returns. The Volunteer Income Tax Assistance program, (VITA) gave students actual training in helping people while providing free assistance in completing the complicated forms.

During February, March and April, VITA, working with the Northeast Missouri Area Agency on Aging and Northeast Missouri Opportunities, placed students in community centers in Moberly, Lancaster, Memphis, Wyaconda, Kahoka, Macon, Edina and Kirksville. There, the students helped people with the calculations, the percentages, and the arithmetic necessary

terials provide lessons that are ambiguous. There can be no right or wrong answer. The student must identify the problem and invent its solution. Assignments might be: "Photograph evidence of change," "Find things that represent power," "Record the sound of something important." The MESA project utilizes the material of the American Geological Institute Environment Studies office of Boulder, Colorado.

The program provides many first-time experiences for those attending the sessions. Camping, canoeing and sensitivity sessions are some of the activities. Dr. Rosebery has taken one fourth of the teachers on airplane trips over strip mines and channeled rivers, like the Missouri and Chariton. Field trips to St. Louis, Kansas City, Chicago and Hannibal are also included. "It opens up a whole new world for the teachers," the MESA director said. "If they want to go some place, they'll make it before the summer's over.

"We've had kindergarten teachers, ministers who are teachers, home ec. teachers, media people; you name it, we've had them all," Rosebery said. "Special education and art teachers do the best at these sessions because they are freer to create and be imaginative. Teachers who are dogmatic and only have time to lecture don't do nearly as well."

Three four-week sessions are held from June through August and are open to teachers within the 21 participating school districts in the Northeast Missouri and St. Louis areas. Approximately 30 teachers attend each session, said Nancy Bane, science instructor and member of the MESA team. She is currently filling in for Dr. John Settlege, professor of science, who is in Australia promoting the environmental studies program.

Meetings are held six times a year after the summer session from which the teachers choose four to attend. "Four to five hours of graduate credit can be earned from the summer session, and two to three hours from attending the meetings," Miss Bane said.

Last summer a separate session was held for science and so-

Gallup terms public mood 'bleak'

The mood of the public is "bleak" regarding the U.S. economy, George Gallup, Jr., president of the Gallup Poll, told an audience at the University recently. Gallup's lecture, "The Mood of America at the Start of 1975," was the lecture program of this year's Lyceum Series.

"No single problem has dominated the minds of the people as the economy does today," Gallup said.

He cited recent Gallup surveys that show 87% of Americans think that unemployment will rise in 1975, 65% anticipate a year of labor strikes and a majority predict international discord in the current year.

Gallup made several comments on the political scene. He said that a poll taken before January's State of the Union Address showed that as many American's disapproved of Gerald Ford's actions as president as approved. His opinion polls show George Wallace, governor of Alabama, as the forerunner among the Democratic presidential hopefuls followed by Senators Muskie, McGovern and Jackson as a group.

Disillusionment with politics is at an "all time high" while the proportion of Americans who describe themselves as Republicans is at an "all time low." Also at an "all time high" is the proportion of people who describe themselves as conservative.

On other matters, Gallup noted that his most recent poll shows an increased feeling on the part of the American people that religion has a major impact on their lives, a

George Gallup

rise of 14% to 31%.

When asked to name the person they most admire, nearly one-half of Americans polled were unable to give an answer. Those who did answer cited Dr. Henry Kissinger, Secretary of State, the Rev. Billy Graham and President Ford as the most admired men. Most admired women were Prime Minister Golda Meir of Israel, First Lady Betty Ford and former First Lady Patricia Nixon.

Gallup noted that the American public feels that the press does not give a balanced account of the news but respondents were equally split on the question of whether or not the press reports with bias.

Polls show attitudes on sex, family size and marriage have changed "remarkably" in the last few years; and despite health warnings, Americans are drinking, smoking and eating more than ever before. ●

cial science teachers. It was conducted by Al Copley, assistant professor of earth science, for four weeks plus inservice (during the academic year) experience.

"Under the Environmental Education Act 50 administrators were invited to the NMSU campus three years ago to decide how to combine environmental science into their curriculum," said Dr. Jack Magruder, professor of science and MESA staff member. Administrators of 21 schools decided to par-

ticipate to further extend the Environmental Education Project and became part of the proposal.

MESA is funded by the United States office of Health, Education and Welfare. It is a project of the Elementary Secondary Education Act, Title III. The three-year grant expires June 1975, so there will no longer be any sessions after that month. Dr. Magruder said that, possibly E.S. will be offered as a regular course beginning the summer of 1976. ●

Fine Arts initiates 'Lollipop Concerts'

by Cindy L. Bell

A member of the audience conducts.

A new dimension was added to children's entertainment in Kirksville by the "Lollipop Concerts." Performed at the Kennedy Theatre, this new series featured select musical groups from NMSU and provided an opportunity for Kirksville's elementary school children to become acquainted with musical instruments and music.

The idea originated in Kansas City a few years ago when the Kansas City Philharmonic Orchestra decided to reach out to the young people of the Kansas City area and acquaint them with the symphony.

The results of the trial concert series in Kansas City proved so successful that the number of concerts was increased from four per season to 12. William Hopper, manager of the Kennedy Theatre, realized a similar concert series could benefit the children of Kirksville.

The first step was to find a place willing to accommodate such an undertaking. Since the Kennedy Theatre was once a vaudeville theatre, and is well-known in the community, Hopper said that he thought it would serve as a good performance house.

Next, funding had to be found. When contacted, merchants and local industries expressed support for the concerts by paying for the

rent of the Theatre. The musicians performed free of charge.

Finally, Hopper enlisted the musical talents of the NMSU Fine Arts Department. Dr. Dale Jorgenson, head of the division of fine arts, worked closely with Hopper in making the many preparations needed to plan the program.

One problem encountered was the stage which had been idle for several years prior to this time and used as a storage area. Time and help were short when the renovating process began. The old stage had to be cleaned and repainted; stored objects had to be moved, thrown away or refurbished; and lights and other equipment had to be repaired. Manpower came from the members of Phi Mu Alpha Sinfonia, the men's professional music fraternity on campus which Hopper described as "a dedicated bunch of guys."

Dr. George Evans, superintendent of the Kirksville public schools, supported Hopper's idea from the beginning and made arrangements for the students to attend the concerts. Acting as the school liaison, Mrs. Pat Smiser, director of special projects for Kirksville schools, set up the busing of the students to and from the theatre. She also worked with their parents in publicizing the concerts.

Aiding in the seating of the children was the Gamma Phi chapter of Beta Sigma Phi sorority. They also helped distribute lollipops to the children as they left the concert. The only cost to the children was five cents for the bus fare. All other money was donated by local merchants and industries.

The first concert was performed January 23 to an enthusiastic crowd of children from Greenwood Elementary School from kindergarten through third grades. The NMSU Woodwind Ensemble directed by Dr. David Nichols, associate professor of music, and the Brass Choir directed by Dr. Roger Cody, professor of music, performed.

"The concert was great for us because we've never played for little kids. They're quiet and enthusiastic. Just the sound of the applause was even different, hearing hundreds of little hands clapping," Cody said.

The musicians demonstrated each instrument for the students and enjoyed the experience of playing for the little ones. He said that the children enjoyed the music from "The Entertainer (The Sting)" the best.

The response of the young listeners came several days later when Cody and Nichols received a batch of letters. One second grader said, "Your music made me feel like a sof (sic) cloud." One musical prospect wrote that "some day I would like to play the trompon (sic)." But the feeling that many of them expressed was summed up by one student who wrote, "I liked your music, but I liked the lollipops best." ●

Jazz festival pulls 50 bands

by Cindy L. Bell

Phi Mu Alpha Sinfonia professional music honorary presented its seventh annual Jazz Festival during March. Contests for high school and junior high school jazz bands were held that morning and afternoon. That evening first place winners from each class performed at Baldwin Hall Auditorium.

Fifty bands represented Illinois, Iowa and Missouri at the largest jazz festival in the tri-state area, according to Dr. Roger Cody, professor of music and faculty coordinator of the festival.

Top bands in each of five classes were: Class 4A — Winnetonka High School, Kansas City, Mo., Steve Lenhart, director; Class 3A — Salem High School, Mike Heitman, director; Class 2A — Macon High School, Larry Bennett, director; Class 1A — Viburnum High School, Rich Stitzel, director; and Junior High — Pittman Hills Junior High, Raytown, Mo., Bud Haley, director. ●

Music student interns with St. Louis symphony orchestra

by Cindy L. Bell

"Pucker up!"

To most of us, that phrase prepares us for a big, juicy smooch! But Mark Firks' lips have been puckered for 13 years, all devoted to playing the French horn. Now, his time and dedication have rewarded him with a six week internship with the St. Louis Symphony Orchestra.

Firks' internship allows him the opportunity to learn the atmosphere

of professional music production in the environment of a major orchestra. He will evaluate orchestra music as a profession through informal and formal contacts with members of the orchestra. Mark said he would like to play the French horn professionally, but economic considerations may prohibit this.

Although restricted by musician's union rules from playing in concerts and practices, Mark will sit in on orchestra rehearsals at Powell Symphony Hall. He will also take private lessons from Roman Pandolfi, principle hornist for the St. Louis Symphony Orchestra.

Firks' acceptance in the orchestra was based on recommendations from Dr. Dale Jorgenson, head of the division of fine arts, Dr. William Fitzsimmons, professor of music and Edward Bostley, instructor in fine arts and Firks' horn teacher. He also submitted an application to and auditioned before Mr. Pandolfi when the Symphony was in residence at the University last fall.

The 24-year old graduate student had an assistantship through March with Dr. Tom Ritchie, professor of music. During this time he was an assistant in Dr. Ritchie's music theory class. Mark will receive his M.A. in music education in August 1975.

In order to complete Master of Arts requirements before he left for St. Louis, Mark had to pass his preliminary recital in February before an instrumental committee and present it to the public. "All I've done this semester is practice," Mark said. And understandably so, for half of the hour-long recital was memorized pieces by Strauss, Mozart and Dukas. Works by Schumann and Reicha composed the final half-hour of the recital.

After graduating with a B.M.E. in 1972 from NMSU, Mark taught for two years in Cairo, Mo. There he was a vocal and instrumental music instructor for kindergarten through twelfth grade. ●

Dr. Ryle receives Scouting award

John Johnson, Thousand Hills chairman, Dr. Ryle and President McClain.

Dr. Walter H. Ryle, president emeritus of the University, was presented with a plaque for more than 55 years of service to Boy Scouting at a February meeting of the Thousand Hills District, Great Rivers Council of the Boy Scouts of America.

He first became a scoutmaster in 1917 while principal of Clifton Hill High School. During his long career in scouting he helped organize several of the first troops in Holden, Mo.; was a member of the staff of the scout executives of the old Kirksville Council of Boy Scouts of America (known now as the Great Rivers Council); president of the Kirksville District

(now Thousand Hills) from 1943-1946; president of the Central Missouri Council (now Great Rivers) from 1949-1951; was national representative of the Great Rivers Council to the national council, 1951-1954; and district commissioner, 1970-72. He has been an executive board member of the Great Rivers Council for nearly 50 years.

Dr. Ryle is the recipient of many honors including the Silver Beaver Award, the Patron of Scouting award and a bronze medal presented by the Great Rivers Council for "fifty years devoted leadership." ●

Taylor named football coach

Ron Taylor

Ron Taylor has been selected by the University Board of Regents to replace Randy Lukehart as the head football coach.

Taylor comes from Long Beach State University (Calif.), where he was the offensive coordinator. He is to serve in the head coach position the remainder of the '75 school year and the entire 1975-76 school year.

"I'm enthusiastic about my new job, and I'm appreciative of the confidence shown in me by everyone at NMSU," commented Taylor.

Taylor played football under Dan Devine at Missouri in 1960 and 1961. He quarterbacked Tiger teams that amassed a record of 18-2-1 including a 1961 Orange Bowl victory over Navy. After the 1961 season he performed in the Blue-Gray Shrine game on the north squad.

Later he served as a graduate assistant under Devine for one year.

After his graduation from the University of Missouri in 1962 he coached for five years on the high school level at Joplin, Mo., and Rich East in Park Forrest, Ill.

He also coached seven seasons on the college level. Prior to Long Beach State he was offensive coach at Shippensburg State College in Pennsylvania and at the University of Utah as quarterback and receiver coach. He was head freshman coach for two years at Utah.

He and his wife, Sharon have two sons; Tim, 13, and Todd, 12. He played high school football in Chillocothe, Ill., where his father was coach.

"There is a great athletic tradition at the University, plus fine athletic facilities. Moreover, there is a potential for a good football team here. We'll start our recruiting late, but we'll try to find the best available young men," Taylor said.

Throughout spring practice, Taylor has emphasized the attitudes and the atmosphere that is essential to good teamwork. "We're working on developing a feeling of unity and pursuing an atmosphere of winning," Taylor said. "And I think we are achieving it."

"Right now, I think our major strengths are in our skill position, that is, quarterbacks, halfback, fullbacks, and wide receivers. Our defensive secondary should be good for us, too, as we have a lot of experienced players returning in that area Taylor said. ●

Horseshoe finals won by TKE team

by Kevin Andrews

There were no screaming fans, no cheerleaders, no marching bands, and when it got dark, there weren't even any lights. Once again, the horseshoe pitching finals went virtually unnoticed.

Although horseshoes may not be the most glamorous I-M sports event of the year, it certainly merits some recognition.

This year's championship held just south of Stokes Stadium was one of the most exciting ever.

This year's finals matched Clarence Marks and Harold Schnei-

der, two University employees, against David Bethel and Randy Etter of Tau Kappa Epsilon Fraternity. Ironically, the same pairs were supposed to meet in the finals two years ago, but inclement weather kept the match from being played.

Veterans Bethel and Etter were completing their fourth year as a team. They made the finals for the last three years and won the championship in 1972.

In game one of this year's "best of three" series, Marks and Schneider took an early lead but Bethel and Etter fought back to take an 18-17 lead. In the last inning, Bethel threw a ringer which would have put his team out but the score was nullified since the shoe had "nicked" the box. Marks responded by throwing a ringer and a pointer to put his team out.

Game two found Bethel and Etter behind again in the early going and a championship for the TKE's looked doubtful. Then Etter caught fire and started throwing consistent ringers. In the bottom of the last inning, Etter threw a pointer which put his team out at 21.

With one shoe left, Etter, having already won the game, just threw his shoe high in the air and it came down, where else, but right around the peg for another ringer.

It was getting dark and cool by the time game three started, but Etter and Bethel could not be cooled. They won the third game handily to win back their title which they had lost in 1973.

Bethel and Etter are both graduates from Montgomery County High School and have proven themselves as "the team to beat" down through the years.

"We've both played since we were kids," said Bethel, "and we stay in practice by playing in local tournaments during the summer. However, a lot of luck is involved in winning the all-school title since neither of us have the time to devote to practice during school. It was nice to win the championship back."

When asked about his horseshoe pitching days at NMSU, Etter's only comment was, "It doesn't pay well enough." ●

Spotty season for netmen

by William H. Cable

In some ways, the 1974-75 basketball season at Northeast Missouri State fell below Bulldog hopes and expectations.

But in other respects, the campaign had its share of high points and achievements.

"We played well at home, losing just one of 12 appearances in the confines of the Pershing Arena, and we set several records during the season," exclaimed Coach Willard Sims. His charges posted a 14-12 overall record and a 6-6 ledger in the Missouri Intercollegiate Athletic Association, deadlocking Southwest Missouri State for fourth in the circuit.

New standards taking their place in the school record book include most points in a single game (123), most rebounds in one contest (72), most field goals in one game (58) and highest team field goal percentage for one season (.462).

Marks for scoring and rebounding were rewritten against School of the Ozarks Feb. 21. The other single game record was eclipsed in a Feb. 25 encounter with John F. Kennedy.

This year's quintet also compiled one of the highest scoring averages in Bulldog hardwood annals, 82.5. Only the 1955-56 and 1963-64 editions surpassed that figure.

Four times this winter, the Sims men surpassed the century mark. In addition to a record-smashing 123-58 victory over School of the Ozarks, they pillaged John F. Kennedy, 120-80; Mt. Marty, 104-76; and Central Missouri State, 104-95.

Junior forward Charles Rose, a transfer from Northern Idaho Community College, led the Bulldogs in point production with a 14.4 average, 10th best in the MIAA. He was among the top 15 leaders in league rebounding with an 8.8 figure.

Backliner Dan DeMartin, one of two regulars the skipper must replace, sizzled the nets during the final month of the season to finish

second in club scoring with a 13.3 clip. The 6'4" senior set a steady 17.8 pace in the homestretch. He ranked seventh in conference field goal shooting with a .514 percentage.

Scott Bobysud was the top carom snatcher for the Bulldogs, finishing third in the MIAA with a 10.4 page. The aggressive 6'7" postman switched to NMSU last fall from College of DuPage in Illinois. As a team, NMSU outrebounced foes by an average of 54.5 to 41.9.

The Purple and White wrote their best credentials at the charity line for some time, clicking on .672 per cent of their gift tosses. Sophomore Pat Blue, 6'2" forward-guard, was second in league free-throwing accuracy with .804.

"Our only setback in Kirksville, a 63-49 defeat at the hands of MIAA champion Lincoln, turned out to be the death blow to our hopes for a conference title," maintained Sims. "No league school can afford to stub its toe at home, and the loss to Lincoln came early in the loop season. Actually, we were in every MIAA contest we dropped, except the Lincoln game at Jefferson City."

Two of NMSU's non-league defeats were to a pair of Big Eight opponents, Oklahoma and Kansas, which successfully defended its crown this year.

Errors at a pace of 19 for each

appearance on the court were costly, particularly on the road where the Purple and White could muster only an anemic 3-11 mark. The turnover category will receive lots of attention next year, according to Sims.

The most pleasant surprise of the 1974-75 calendar was reserve pivotman Warren Reilmann.

"He progressed faster than we anticipated," commented Sims. "He and Bobysud will be important keys to the 1975-76 season."

Reilmann averaged 5.3 points and 4.3 rebounds this past campaign. But considering he logged only 13 minutes per outing, his offensive output was far more impressive than his bare statistics might indicate, according to Sims.

"We'll miss the services of DeMartin, Jim Blaydes and Jim Moton," he continued.

Blaydes was the assist leader with 103. He was the only man on the roster to play the past four seasons in a Bulldog uniform. Moton was a reserve frontliner who saw starting duty early in the campaign.

Ten holdovers are slated to return in 1975-76, but the mentor and his assistant, Ben Pitney, will be active during the recruiting period.

"We'll seek a high school and junior college backliner, a juco forward and a forward and center from the prep ranks," Sims said.

Richerson named head of PE

Dr. William Richerson, former member of coaching staff and health and physical education faculty, was named head of the division of health and physical education by the Board of Regents. Dr. William Richerson was assistant football coach, golf coach and instructor of health and physical education from 1961 until 1970. Dr. Richerson also will have the title of professor of health and physical education.

In making the announcement, Board President Mary Alice Bunney of Shelbyville said Dr. Richerson's appointment will be effective June 1, 1975. Presently he is assistant professor of physical education and assistant football coach at the University of Wisconsin-Madison.

He was a member of the Bulldogs' 1951 MIAA championship team, being selected to the second all-conference squad that season. He received a B.S. degree in education in 1953 and an M.A. in 1954, both from NMSU. He entered the Army in 1954 and was assigned to special services at Camp Wolters, Texas, until his separation in 1956. Richerson coached football at Austin High School in Chicago and was varsity football coach, golf coach and English instructor at Grant High School in Fox Lake, Ill. He was awarded his doctor of philosophy from the University of Utah in 1970. Dr. Richerson replaces Dr. Joseph P. Dolan who died in fall, 1974. ●

Happy days are here again

Twelve members of the Class of 1924 attended a reunion banquet at the Student Union of Northeast Missouri State University Friday night during 1974 Homecoming activities.

Dr. Pauline Dingle Knobbs, a member of the 1924 Class and a retired faculty member at the University, was the speaker. There were many nods of recollection among the honorees as Dr. Knobbs retold some of the experiences she remembers from her years as an undergraduate on the Kirksville campus.

Each of the graduates were given two paperweights as mementoes of the reunion; one with the school's seal on it and a second with a piece of brick from the original Baldwin Hall sealed inside it. The original Baldwin Hall burned to the ground in 1924. The bricks were unearthed last summer while new drain pipes were being installed. ●

Ollen E. Owen, and Francis Wickless Novinger.

*MIAA Games

Enter the young

by Thomas R. Shrout, Jr.

In higher education today a phrase often repeated is "Admissions is the name of the game." But to Jim Grossman being surrounded in a motel by 18 highway patrolmen or to Mary Harrington dropping a box full of brochures in a high school hall or to Terry Taylor visiting three high schools 100 miles apart in one day, it might seem to be carrying this philosophy to the extreme.

The philosophy, too, is probably inconsistent with the traditional goals of higher education. However, in a period of declining student enrollments, the viability of many higher education institutions are on the line because of the lack of students.

At NMSU, though, one of the nation's youngest admissions staff has fought this trend and increased the freshman enrollment in quantity and quality. Since 1972, enrollment has jumped 25 per cent. At the same time NMSU freshmen are scoring higher on national tests and rank higher in their high school graduating classes than they did three years ago.

All this despite the highway patrolmen, dropping boxes and a tight schedule.

Terry Taylor, who became director of admissions, in August 1972 at the age of 22, credits at least part of the success to the young staff.

"We obviously have the youngest staff anywhere and we get the jump on most other colleges because of it," Terry says.

"At the time Jim came to work he was 23, Mary was 22 and I was 23, so our combined ages were less than one admissions director at some colleges and universities."

Terry Taylor

Terry was graduated from NMSU in May 1972 summa cum laude, but actually went to work assisting in admissions in February of that year as he had completed his course work. While in college, he was a member of several organizations including the tennis team and Blue Key service fraternity.

Mary began working for admissions in the spring in 1973, also before she was graduated.

"I had an eight-week free period before I was to do my student teaching, and Terry needed someone to travel, so I hit the road," Mary says. She was a member of Sigma Sigma Sigma and chairwoman of Panhellenic rush.

Jim is the only non-NMSU graduate on the staff although he has done graduate work at the University, between visiting high schools. He joined the staff in July 1973. He had held a variety of jobs after being graduated from the University of Kansas in 1971. He and Terry were graduated together from high school in Marshalltown, Iowa.

Not being from NMSU, Jim acts as the devil's advocate on the staff.

"I think my objectivity is better having been exposed to big and little schools. I can tell a high school senior what it's really like to sit in a class of 1,200 at a large university. I've been there."

Terry understands a high school senior's indecision. In response to this, Terry has developed a personalized approach to fully explaining questions.

Although the old "Senior Day" when 800 or 900 students from area high schools visited the campus for a day has been eliminated, the seniors visiting the NMSU campus receive close attention. In place of Senior Day, individual senior classes, groups or clubs within a school have been invited for their own special day.

When the group comes to campus, or for that matter even an individual student, they first meet with Terry, Jim or Mary and view the sound-slide presentation. After any questions are answered they are taken on a tour of the campus by one of the "Student Ambassadors."

The Student Ambassadors are a group of 25 coeds who assist the admissions office in many ways, including the conducting of tours.

"After the tour the students meet with a professor or the division head in their academic areas of interest. Our faculty has an open-door policy with prospective students and this helps since often a student will visit a campus and never see the person who will be teaching him," Terry says.

Often groups or individuals visit campus after having talked to an NMSU alum. Terry, Jim and Mary agree that whenever they run into alumni, either in a school or in the community, the alumni are cordial and willing to go out of their way to lend assistance for the admissions effort. Last year an inquiry of alumni about prospective students resulted in more than 50 students applying for admission.

"Alums who are teachers in a school we visit or even members of the community help us get in touch with prospective students. Also, we try to get in touch with the alumni who are teaching when we visit a school," Mary says.

Mary adds that she has teachers come up and introduce themselves as alumni and often they inquire about their former faculty members at Northeast.

Terry agrees: "Alumni support is a very subtle thing. How they

help the most is by having a good feeling about the institution. I've never heard anyone say anything about NMSU that they didn't like.

"Students who come to us with the recommendation of an alumnus receive special consideration others may not. It's an added credential," Terry says.

"Our students have done well," President McClain says. "When we appear before the legislature for appropriation requests some schools point to how large their enrollments are. We like to point to how well our alumni have done as an indication of what the taxpayers are getting for their dollars.

"For instance, while we have the second smallest enrollment of the five state universities, last year we graduated the second highest number of students and maintained academic excellence with an outstanding faculty who provide quality instruction."

But the personalized approach doesn't stay on campus. Terry, Mary and Jim haven't overlooked the old standby in admissions, the high school visit.

Jim figures that last year he travelled 40,000 miles visiting schools in NMSU area, gathering some pretty strange experiences. Like the time the highway patrol captured three persons at the motel where he was staying; they were charged with holding up a store.

Mary spends a lot of time in the St. Louis area.

Among the three of them, they covered 440 high schools and junior colleges last year.

At the schools they may talk with a single student or sometimes the entire student body is called into the auditorium for the presentation.

"Sometimes we get to be a little bit like a performer," Mary says. "Early in the year we find audiences react well to certain approaches so we use them and others we discard. Sometimes I feel a little bit like Johnny Carson doing a monologue."

The three try to adapt their presentations to the audience depending on the size of the high school and whether or not parents are present. But they always remain honest in their visits with students.

"We often advise students to attend other schools if NMSU doesn't have a program in a student's area of interest. If you misrepresent your product, you will lose business," Terry says.

The biggest obstacles they have to overcome are NMSU's reputation as being a school only for teachers and as a "suitcase college."

"Next year we will graduate more students with non-teaching degrees than with teaching degrees, and we have to let prospective stu-

Mary Harrington visiting Brashear high school.

Jim Grossman

dents know this," Terry says. "While we are proud of our reputation as a teacher-training institution, we hope future students will realize we are a multi-purpose university offering a variety of career-preparation options."

The other problem is a bit more difficult to get a handle on, the reputation as a "suitcase college." Terry, Jim and Mary agree that the student affairs division is offering many more activities to occupy students on the weekends. The state park and one movie theatre, however, still remain the major off-campus attractions for students under 21, as they have been for the last 20 years.

"This is a real problem when you're talking with a student who is considering attending Southwest Missouri State at Springfield or one of the University of Missouri campuses in Columbia or the metropolitan areas," Jim says.

But a contributing factor in living down reputations has been the

advertising effort in the St. Louis area and an invigorated scholarship program.

"We were the first public four-year institution in the state to use the electronic media for advertising and also the first to offer a full scholarship based solely on academics," Terry says.

"One result has been an increased awareness of NMSU by high school students in the St. Louis area. When I went to St. Dominic high school in St. Louis in 1972, I talked with one student. Last year, after two students had won Pershing Scholarships and the advertising had been run, I talked to 36 students."

While studies of recent freshman classes reveal hardly any students were motivated to come to the NMSU campus solely on the basis of the advertising program, the students do show a strong awareness of the University's strong points — points which were repeated often in the advertising

program.

This advertising effort represents a facet of scientific marketing approach which the staff has credited as a reason for the upturn in admissions.

"Not being an alumnus, I sometimes view the University as a product to be sold. I view it with detachment and try not to have the bias which Terry or Mary might have about a particular course or division. I try to report to prospective students the overall strengths and weaknesses of the institution from an objective point of view," Jim says.

Terry agrees that marketing techniques have enhanced the admissions effort.

"We use a 12-minute filmstrip with synchronized sound as a part of all our presentations. We've also developed mailing lists of prospective students and high schools in a three-state area. One of our best ideas has been from the time a student applies until he is admitted, he receives personalized letters from students, faculty and even the President," Terry says.

These methods have been successful in the current era of enrollment. Terry has been in the business just long enough to see the change in enrollment figures. "When the draft was on, everyone was wanting to go to college. Admissions was a job of processing applications. Colleges and universities had the attitude of don't call us, we'll call you."

To illustrate, the enrollment at NMSU grew over a 10-year period from 3,286 in the fall of 1961 to an all-time high of 6,273 in the fall of 1971.

"A lot of this growth can be attributed to Mr. (Charles J.) Elam, who was director of admissions during that time. He has tremendous rapport with high school officials. The counselors still ask about him," Terry says.

Elam became head of the division of extension and placements in 1972, which left his former slot vacant.

"I knew admissions would be a challenge not only for the new director, but the entire University as we moved into the 70's," President Charles J. McClain says. "All the

statistics on birth rates plus the lack of the draft point toward a declining enrollment.

"Terry, I thought, had the intellect and imagination to develop an admissions program which would make high school seniors want to come to NMSU. So far he has proven me right," the President says.

NMSU hit a low of 925 first-year freshmen during the fall of 1972. Enrollment increased in 1973 and last fall the freshman enrollment hit 1,233, an increase of 25 per cent over the 1972 low point.

While freshman enrollment has increased, the overall enrollment has slipped, but this should change. "Next fall we should take in more students than we graduate and

should show an overall increase in enrollment for the entire student body," Terry adds.

How much longer will this upward trend continue?

"Maybe a couple of more years," Terry says. "One thing is for sure, when we reach 1980: the number of high school graduates drops off so significantly that virtually all institutions will show drops in enrollment."

Having gone through one period of declining enrollment and with another almost certain to come in five years, President McClain sees the University as well as the entire state having to address some fundamental questions about the nature of public higher education.

"We have been number oriented

in the past. The Coordinating Board and others in decision-making capacities will have to realize that growth in the size of the student body is not fundamental to our society, but rather the growth which takes place within the individual student while he is on campus is what is important," President McClain says.

"An adequate level of support must be maintained for all segments of higher education almost regardless of their size as long as they continue to provide the highest quality education, and I think we're doing this as well, if not better, than anyone else in the state." ●

NMSU ROTC

by Patty Byrum

During the 1960's the Reserve Officers' Training Corps (ROTC) served as a target for the insults and the anger of student protest. A member of ROTC was regarded with suspicion by many students. ROTC reflected the Establishment and the Establishment was not popular. Enrollment in ROTC dropped.

But in 1970's the anti-war movement faded. The economic prosperity of ten years ago is gone, replaced by rising unemployment. ROTC is popular. And the ROTC program at NMSU is one of the most popular in the nation.

Under the leadership of Lieutenant Colonel John E. Martling, the ROTC program has undergone revisions that have attracted more students. Through outdoors projects, rising women enrollment, scholarships, and interested faculty personnel, the program has tripled in size in two years. Presently, there are 437 students enrolled in the program, of which 370 are freshmen, ranking ROTC at NMSU as the largest in the state and the eighth largest in the nation.

Five commissioned officers and six non-commissioned officers are assigned to the ROTC program, which is administratively defined as the division of military science. Freshman and sophomore courses do not incur any obligation to the military service or reserve. The ROTC program fits into the electives of any academic major. A two-year program of advance training is available to junior and senior students.

ROTC is currently offered as a four-year program in nine military colleges and nearly 300 civilian colleges and universities. For a college that does not offer Army ROTC, cross-enrollments allow students to participate in the programs at an institution near him.

NMSU and Indian Hills Community College in Centerville, Iowa, signed such an agreement in August, 1974. This agreement allows NMSU ROTC instructors to conduct classes in military science on the Indian Hills campus. And enables Indian Hills' students interested in ROTC to complete the first years of basic training at the

junior college.

A reorientation of the required activities from drill and ceremony activities to outdoors training such as survival techniques and the use of compasses and maps has helped cause the upturn in enrollment.

"There is tremendous amount of interest among the student body in these activities," says Martling, head of the division of military science. "There is a trend toward ecology. And that type of activity tends to cause us to examine the outdoor activities related to survival, mountaineering and back-packing.

"We are stressing participation, student instructors and hands-on training," Martling adds.

Participation in the ROTC program is voluntary and these outdoor activity classes have a low rate of absenteeism. Martling says that students often talk to an instructor about making up classes they have missed.

The ROTC program opened to women in 1972. More than 150 women are now enrolled at NMSU. Women can become commanders,

Glenn Stumph, a senior in law enforcement from LaPlata, rapells down from the back wall of Stokes Stadium.

staff officers, executive officers and serve in the military intelligence. Women have the same salary benefits and job opportunities, but are not required to serve combat duty.

One important aspect of ROTC for many women is the Army nurses program. After graduation from a nationally-accredited nursing program, nursing trainees are sent to the Academy of Health Sciences at

Fort Sam Houston in San Antonio, Texas. For five weeks, the armed forces medical personnel participate in basic orientation. The personnel then receive further training at a specialty school or are assigned to an Army post or hospital.

Melissa Heldmann, a junior from Bridgeton, intends to follow this route. A major in nursing, Melissa joined ROTC because she was curious. She later enrolled in

the ROTC nurses training program. After taking time for graduate school, she intends to transfer to a specialty school in Army nursing.

Presently the NMSU nursing program is state-accredited, and will be evaluated for national accreditation by the National League of Nursing early next year.

For men and women, enrollment in ROTC doesn't automati-

ally require full-time service in the Army. According to Lt. Col. Martling, the Army requires only about 4,000 new officers each year on active duty from ROTC. Often, there are more graduates than there are openings.

Those students who do not get into active duty go into the active reserve. Once accepted into the reserve, the new graduate must complete a three-month basic training course. After that, the officer can move to any location in the country, depending on professional choice unrelated to the reserve.

"If there is not an active reserve unit within 50 miles of the officer, he goes inactive. He doesn't do anything. He stays in that status for eight years. After the eight years, he's just dropped," Martling says.

"Last year it broke down pretty much 50-50. The people who wanted to go on active duty got active duty and the people who did not want to go on active duty, did not have to go," Martling explains.

But if ROTC trains students for the Army and the student knows he may not serve, why enroll?

Often, job interviewers looking for people to fill management positions closely examine students who have had ROTC training. Because the leadership laboratory and classroom training emphasize efficient use of resources, ROTC students are often familiar with decision making while still in school.

Also, the ROTC program contains a variety of professional and social activities. One such organization is Spartans, the military science club, which trains cadets through specialized activities. Other groups include the Men's Drill Team, the Women's Drill Team, Black Jack Rifle and Pistol Club, Parachute Club, and the Outing Society. ●

Legislative Report

President McClain's
testimony before the
appropriations committee

Editors' note

The appropriations process involves several steps beginning with each state agency submitting a proposed budget to the Governor for his review. The Governor considers and usually modifies the request. All the requests are compiled into one document known as the Governor's budget which he delivers to the General Assembly in the form of a "Budget Message."

Then both the Senate and House Appropriations Committees hear testimony from the agencies at which time the agency presents its justification for budget needs for the upcoming fiscal year. Action by the committees is presented to their respective chambers for action by the entire body.

After that, any differences between the legislative bodies are ironed out for final passage and then sent to the governor for his signature or veto.

Perhaps the highlight of the appropriations process is the hearings before the Appropriations Committees. It is at that time the agency, or in our case the University, must justify its need for millions of tax dollars and articulate how those dollars will be used to further the welfare of the citizens of Missouri.

On February 10, 1975 President McClain and four members of the Board of Regents appeared before the Senate Appropriations Committee. What follows is an excerpt from President McClain's remarks before the committee in which he eloquently addressed the needs of higher education and its unique role in our society. ●

Senator Merrell and gentlemen of the Committee:

I am grateful to you for the support which you have shown Northeast Missouri State University in the past and I assure you we endeavor to warrant your continued confidence. I appreciate the opportunity to review with you our request for General Revenue and our future plans at Northeast. Our budget request lists in detail the measures of performance to continue our present level of service, the amounts needed for priorities and the measures of performance to justify funding of those priority items.

At first glance we were taken back by the January 17 editorial in the St. Louis Globe Democrat which contrasted a 4.6 per cent increase in State revenues with an 11 per cent inflationary factor that further erodes our purchasing dollars. Clearly this is a year in which difficult funding decision will be tempered with the analysis of reams of budgetary material, the study of priority requests and the inevitable consumption of a valuable energy product — the burning of midnight oil which has typified appropriations committees and conference committees for many years.

We will accept your judgment of Northeast's fair share of the General Revenue as we marshal our resources to provide a quality educational program within the existing financial constraints.

Before I discuss our request in detail and answer your questions it seems fitting to observe that any budget — be it for a small office at Northeast or for the entire state — is a matter of priorities. Priorities for education have been addressed at least 20 centuries. The Massachusetts Bay Colony started the first public school in 1635. They believed in Aristotle's Theory: "All who have meditated on the art of governing mankind have been convinced that the fate of empires depends on the education of the youth."

Education can be funded, of course, at any level. Indeed, it need not be funded at all. But the degree of funding would have a definite ef-

fect on the outcomes and end results of the educational process. While we often use the terms resources and dollars interchangeably, another resource should be kept in view — the minds and potential of our children.

We have come to an age when business terms are used to build formulas for funding institutions. Enrollment alone does not and should not provide that measure. There are other measures — the success of graduates, ranking of seniors on national achievement tests, the number of entering freshmen finally graduated, percentage of faculty with doctorates, scholarship of faculty, amount of time given by faculty to students outside the class hours, and the degree of faculty participation in the internal decision making of the University.

Thomas Malthus in forecasting famine said that food increases arithmetically while population increases geometrically. A more recent author suggested a gap in fulfilling societal needs — needs increase exponentially while the number of educated persons increases arithmetically. Mindful that the bicentennial falls just four days after the fiscal year for this request ends, it has been said that the needs and the outputs were in nearly perfect balance when 13 youthful colonies successfully revolted against the military might of England. They were still in balance in 1814 when England's attempted reversal of independence was thwarted.

It seems ironic that with the increased emphasis on post-secondary education in recent years that still less than one-tenth of the adult population possesses a bachelor's degree. We are blessed with dedicated teachers who continue to pursue their profession mindful that despite their advance degrees they often earn less than persons in skilled and semi-skilled occupations.

I believe I can state without reservation that Northeast enjoys a state of balance resulting from a commitment to our students and our students commitment to their school.

We have doubled the percentage

of the number of norms met on the testing given to our graduating seniors. We are obtaining input from the employers of our recent graduates and the graduates themselves of the last three years to ascertain areas in our programs which need shortening and to take necessary corrective measures. Indices of quality include a continual increase in freshman applicants and an increase in placements notwithstanding a downturn in the economy. In 1974, 17.4 per cent of our freshmen were in the upper 10 per cent of their high school class contrasted with 16.4 per cent in 1973.

At Northeast we expect full professors to teach our freshmen students. We have a full-time freshman counseling staff to guide these students and to assist them in acquiring collegiate discipline so that they can meet the challenges of higher education.

Although we rank fourth in total student population among the five regional universities, we almost invariably confer the second largest number of degrees.

While there is a natural temptation to directly relate dollars to the on-campus enrollment, it should be kept in mind that the goals, priorities and outcomes of institutions may affect why their expenditures in certain areas are higher although they may have fewer students.

Our requested cost for 1975-76 is \$1,470,570 greater than the planned 1974-75 expenditures. Of this amount \$980,250 is for cost increase as suggested by the Governor's budget manual to maintain the present level of services. The remaining amount is priority items.

The \$980,250 in cost increases to maintain our present services plus our planned expenditures this year of \$10,649,864 are referred to as our base budget. Items included in this base budget and in the \$980,250 cost increases, are \$608,619 for salary increases, an additional \$294,439 for equipment and \$250,706 of this would be in three areas that accreditation agencies and outside associations have urged us to add just to maintain a basic level of instruction — \$77,192 for inflationary increase in operations. ●

Each year the Governor and the General Assembly, through the appropriations process, decide the amount of money which the state will provide for the operation of NMSU. Historically, this amounts to about 80 per cent of the total budget for the University. The remaining 20 per cent is made up through student fees, federal grants and other income sources. The budget for the dormitories and student union is separate from the operating budget.

Last year's appropriation was \$8,322,144. With this amount the University faculty and staff was able to maintain a high level of service and education through innovative thinking and prudent management plus make moderate strides in improving the total education program for students.

We think the alumni concur with the thrust that the General Assem-

bly has taken in helping the University to continually make modest improvements each year.

The end result has been that Missouri has not been like other states where large scale expansion during the 60's now means drastic cutbacks for colleges and universities during the 70's when enrollments have stabilized.

The year to year gains may seem small; however, when compared to 1867 when Joseph Baldwin opened the North Missouri Normal School and Commercial College with five faculty members and about 180 students, the School's evolution into a multi-purpose institution is significant. Now offering more than 100 majors in 14 academic areas to 5,231 students, NMSU is grateful for the approach taken by our state legislature towards the development of higher education. ●

NMSU

The legislature has shown a genuine interest in the academic programs at Northeast. With their backing through appropriations, NMSU was able to revitalize its Nursing program in 1971 after the University had been forced to begin plans to phase out the program. Now the University is helping to meet the critical shortage of nurses with this quality program. It has been so successful that presently qualified applicants are being turned away because of a shortage of faculty.

Hopefully, more faculty can be added and an additional 30 nurses graduated each year beginning in 1978.

The Nursing program also is an example of the non-teaching degree programs which have been on the increase at NMSU in recent years. Although Northeast is proud of its tradition as a teacher-training institution, this spring about half of Northeast's graduates will receive non-teaching degrees compared to only 20 per cent five years ago.

The legislature has recognized the library as the foundation of the educational process. Beginning in 1971 the legislature through the appropriations process moved to improve the library holdings at NMSU. In 1970, the University had 24 volumes for every student. In five

years this figure has almost doubled approaching the standard of 50 volumes per student set by the American Library Association.

Through last year's appropriation it was possible for Northeast to become the first public higher education institution in Missouri to join the Ohio College Library Center. With the aid of computers the Center expedites cataloging of new books as well as making literally millions of volumes available to NMSU students and faculty through loans from other OCLC members.

Graduates are the product of an institution of higher education and Northeast has always produced a high number of graduates for the size enrollment of the school. In the May and August graduation of 1974, a total of 1,196 students received bachelors degrees and 331 the masters degree.

Another measure of the University's success which the legislature has shown great interest is the placement service. The NMSU Placement office has found jobs for 95 per cent of those students and alumni seeking them through the office.

Students are finding jobs in business, industry, law enforcement, hospitals, communications, science, technology, as well as teaching and education related fields. ●

Much of the ongoing support in the legislature for NMSU comes from the senators and representatives whose districts lay within the 25-county Northeast District. The area contains all or part of six senatorial districts and all or part of 18 representative districts. This district is from which the governor by statute must choose the members of the Board of Regents for the University.

Historically most of the students who attend NMSU have come from this geographic region although the University is considered a state resource as indicated by the counties of origin for this year's freshman class. Sixty-five counties plus the city of St. Louis were represented among the 1,233 first-time freshmen.

There was a decline in the number of freshmen to enroll in the University to a low of 980 in 1972. However, with the encouragement of the members of the General Assembly, especially those from the 25-county Northeast District, this trend has been reversed as demonstrated by this fall's freshman class which shows a 25 per cent increase over 1972.

Many of these legislators have served the University with distinction not only with their support in the legislature, but also in their communities, recommending NMSU to qualified students in their hometowns. Others have come to campus to participate in seminars, lectures as well as informal give and take sessions with faculty and students, sharing their knowledge of government gained through public service. Still others have opened their offices to students to work along side them in the University's internship program which enables students pursuing careers in government to obtain valuable on-the-job experience.

With this kind of support the future is bright for Northeast. The immediate future shows a modest enrollment increase for the next few years. But more importantly, with this kind of continued support in the legislature, the University can continue its quest for the highest quality education for the citizens of Missouri. ●

The 90¢ per day diet

by Maggie Jarrett

Here's a mind-teaser for inflation experts. If the total operating budget of students living in the campus Home Management House in 1967 was \$87 per student per five to seven week residency (including groceries, rent, utility bills and household necessities), what is the budget per student for a five-seven week residency in 1975?

Eighty-seven dollars.

Sound impossible? Not at all, says Dr. Charlotte Revelle, associate professor of home economics and director of the Home Man-

agement House. She set the budget eight years ago and the girls have been living within it ever since. In fact, until several years ago many of the groups (three to seven students share the house at a time) had money left over. At the end of their residencies they used the money to buy a few "extras" such as a stereo for the living room.

What's their secret? Creativity and ingenuity.

"For instance, when the girls get together to plan a week's menu, they begin by very carefully studying the grocery advertisements in

the Wednesday night newspapers. They read consumer magazines for an idea of which brand of a particular food gives more nutrition than its competitors. Then they arrange their shopping so they can do most or all of it in one trip, visiting two grocery stores at the maximum," says Dr. Revelle.

"The main objective of the residency is to give students practical learning experience in managing money and other resources for the best use of a family at different economic levels. We require students with majors in vocational

Crisis in the washroom!

Unbeknownst to Lynnette Stelphugh (left) and Becky Pruitt, a washing machine hose has disconnected and is pouring water onto the floor.

home economics and home economics management with emphasis in family and consumer finance to complete a residency before graduation so they can integrate their classroom learning into real world situations."

During her residency, each girl spends a week taking the role of cook, assistant cook, housekeeper, manager, waitress and laundress.

The cook and her assistant are in charge of planning the week's menu (with the assistance of the rest of the girls), buying the gro-

ceries and preparing the food. The manager's job is to make the week's budget and pay the bills. The other jobs of housekeeper, laundress and waitress are self-explanatory. And everyone helps out on a special project usually related to refurbishing the interior of the house. This year students have been sewing new draperies. In past years they have reupholstered furniture.

Most of the girls agree that the job of cook is one of the most challenging. Each group of students is

faced with a strict food budget; one week of menus at 87-90¢ per person per day (low income budget); one week of menus at \$1.35 per person per day (convenience foods budget); and one week of menus at \$1.60 per person per day (luxury budget). Remaining weeks have food budgets of \$1-\$1.35 per person per day.

"Making our food dollars stretch is something we learn quickly when we are faced with the low income budget the first week of our residency. It really helps to

Upon discovering the small pond that is growing on the floor, Becky contemplates a solution to the problem.

Becky stays on top of the situation by attaching the drain hose while reaching from the only angle possible.

buy foods that are in season and to make inventive use of left-overs. We always try to use a meat for more than one meal and in more than one way," one girl says.

The students in the house this year have found ground turkey to be relatively inexpensive. It has been sold for as low as 49¢ per pound in Kirksville and they have substituted it in many recipes that call for ground meat. Ground turkey salad sandwiches provide a nutritious lunch and are lower in fat content than other ground meats.

The girls also have found inventive uses for canned mackerel. It can be substituted for salmon or tuna in loaves, sandwiches and casseroles. Liver, low in cost but high in nutrition, and peanut butter, on bread for breakfast or lunch, find their way onto the low income budget menus often.

Many college students are used to ordering a pizza or making a peanut butter and jelly sandwich in between meals. Is hunger a problem, especially on the low-income budget week?

"It depends on the students," Dr. Revelle says. "Some are better at planning menus than others and a lot depends on a person's eating habits and her willingness to change them, at least temporarily. Some of the students who aren't willing to try such foods as powdered milk or grits and fried mush are more likely to get hungry than others."

A typical menu on a "low income" day might be: breakfast — orange juice, egg and cheese omelet, head cheese (made like fried cornmeal mush) and milk; lunch —

While Becky prepares to check the load in the machine, Lynnette pushes the water out of the store room.

Becky completes the clean-up job by helping corral the water into the drain.

vegetable soup, crackers, sweet rolls and milk; dinner — mackerel and noodle casserole, combination salad, stewed apples, iced tea.

The convenience food budget consists of meals that are quick to prepare and still economical. A day's menu using convenience foods might include: breakfast — waffles (ready-made), syrup, grapefruit, milk; lunch — pizza (ready-made mix), garlic bread, carrot and celery sticks, iced tea; dinner — spaghetti dinner (box mix), garlic bread, tossed salad, iced tea, banana pudding (instant).

While on the luxury budget (\$1.60 per person per day), each group of students invite several faculty members to dinner. That's an opportunity for the girls to "show off" their culinary talents. Entertainment and a tour of the house are always included.

In addition to a faculty dinner, each group of students serves an international dinner and a special diet dinner. The special diet dinner must contain food suitable for a person who must follow a special diet such as low-sodium, diabetic, geriatric or ulcer.

"We hope that at the end of the residency each of the students has gained knowledge in family relations, home management, food selection and preparation, nutrition and dietetics, household equipment and housing and interior design. With this background they should be able to adapt to a variety of job situations in the home economics field," Dr. Revelle says. ●

In memoriam

Les Orwiler, well known retired Kirksville businessman, died Feb. 8, 1975, at his home at 906 East Line, Kirksville. He was the husband of **Dr. Mildred Gelbach Orwiler 1936** and had been in failing health for several years. Mr. Orwiler was with International Shoe Company from 1930 until 1945, when he became manager of the Travelers Hotel. In April, 1948, he became a partner in the Bonfoey Insurance Company. He later became full owner of the company and was active in the business until his retirement due to ill health in 1972. Mr. Orwiler was a member of many civic and professional organizations. Funeral and burial services were held in Kirksville.

Ora F. Burris 1908, age 88, of 515 E. Pierce, Kirksville, died February 12, 1975, in a Kirksville hospital. He had been a patient since January 3. For many years Mr. Burris taught in rural schools in Adair County and served as teacher, principal or superintendent in several Missouri high schools. Mr. Burris was active in organizing Sunday Schools and community churches. In 1914 he became a member of Adair No. 66 Odd Fellows Lodge and had served as treasurer since 1942. He is survived by his wife, Ethel Owenby Burris, a son, James H. Burris of Macon, two grandchildren, three step-grandchildren and two step-great-grandchildren. Funeral services were held in Kirksville, with burial in the Forest-Llewellyn cemetery.

Alva L. Crow 1930, age 71, of Boonville, Mo., died February 13, 1975, in a Boonville hospital, where he had been a patient only one day. He had been in failing health, however death was unexpected. He is survived by his wife, Betty Weatherly Crow, a niece and several cousins. Mr. Crow taught in rural schools in Adair County and later was superintendent of schools at Monroe City, Boonville, Jefferson City and Kirkwood. Funeral and burial services were held in Boonville.

Larry D. Johnson B.S.E. 1969 and M.A. 1970, age 28, died instantly after suffering a broken neck in a head-on collision on Iowa Highway 389, January 5, 1975. He is survived by his wife, **Linda Ann Haden Johnson B.S.E. 1968 and M.A. 1969** of Rt. 1, Cedar, Iowa; his parents, Mr. and Mrs. Lawrence R. Johnson of Ottumwa, Iowa; one brother, Dennis of Agency, Iowa; and one sister, Mrs. Lois Hansen of Davenport, Iowa. Mr. Johnson was co-owner of the Blue Jay Aero-Freight Company

of Ottumwa. Mrs. Johnson is a special reading instructor in Ottumwa Community Schools.

Sudie B. Long 1925, age 85, of Fayette, Mo., died February 14, 1975, in a Fayette hospital. She had been in failing health for some time. Miss Long taught first grade at Rawlings School in Howard County and in Rocheport before being employed as fourth grade and later fifth grade teacher in Fayette. In 1924, when Laurence J. Daly Elementary School was opened, she became its first principal, holding that position until her retirement in May, 1960. At that time, when she was honored by the school, former students and the community, a story in the FAYETTE ADVERTISER noted that "If all the people who once were pupils of Miss Sudie stood side by side, the line would extend more than a mile." Miss Long was a member of the Missouri Elementary Principals' Association, the NEA, MSTA, Fayette Branch of AAUW, the M.M.M. Club, Keller Hospital Auxiliary and the Pink Ladies, the First Christian Church and the Rosalie Circle. She had served as treasurer of the Fayette Public Library Board, was a member of the Howard County TB Association Board and had served as chairman of the Howard County Chapter of Red Cross. Funeral and burial services were held in Fayette. She is survived by a nephew, a great-niece and three nieces.

Maude Kay Myers 1907, age 89, of Kirksville, died Jan. 17, 1975, in a local hospital. Graveside services were held in Highland Park Cemetery. Miss Myers was a teacher in Washington and Benton schools for several years and later was employed with the Graphic Newspaper in Kirksville. Before her retirement she was an agent for a fabric company. Miss Myers was a member of the Christian Church. Her only survivors are two nieces, one nephew and several cousins.

Marian Pickell Hunt 1931, life-long resident of Kirksville and operator of the Pickell Abstract Company in Kirksville for over 40 years, died Jan. 31, 1975, in a local hospital. She had been a patient only one day. Mrs. Hunt was a member of the Order of the Eastern Star; White Shrine; Business and Professional Women's Club; Rebecca Lodge; Floriculture Club; Nebulae; League of Women Voters; Daughters of the American Colonists; Daughters of the American Revolution and NMSU Alumni As-

sociation. She was active in civic affairs and was currently serving as a member of the local Bicentennial Committee and was a member of the Kirksville Housing Commission. Mrs. Hunt was a member of the First Baptist Church where funeral services were held, with burial in Maple Hills Cemetery. Survivors include a daughter, Mrs. Donald E. (Helen Jo) Larson of 215 E. Jefferson, Kirksville; one granddaughter, Jo Ellen Larson; two sisters, **Grace E. Pickell 1924** of 211 E. Jefferson, Kirksville and **Mrs. G. D. (Dorothy) Berryman 1928** of 906 E. Illinois, Kirksville. A niece, **Cecelia Tabler Shoemaker B.S.E. 1951 and M.A. 1957** of Las Vegas, Nevada, also survives.

Clara Etta Yadon 1917, age 95, of Kirksville, died November 10, 1974, in a Kirksville nursing home, where she had been a patient since Dec. 7, 1967. Miss Yadon spent most of her life in Kirksville and was employed at NMSU from 1920 until her retirement in the early 1960's. She was a member of the Primitive Baptist Church and the DAR. Surviving are three nieces, Mrs. J. R. Natto of 1201 N. Luther, Kirksville; Mrs. Roy Smith of 409 S. Baltimore, Kirksville; and Inez Verets of Macon. Funeral services were held in Kirksville with burial in New Harmony Cemetery, west of Greentop.

Harold L. Morris 1933, NMSU Alumni Association member, of Anson, Texas, died Jan. 20, 1975, after a long illness. He was minister of Northwest Texas Conference United Methodist Church on disability leave. Survivors include his wife, Mrs. Mary M. Morris and two brothers, L. E. and W. W. Morris.

Clarence J. Miller 1974, son of Mr. and Mrs. Loren L. Miller of Clifton Hill, Mo., died July 29, 1974, at Thomas Hill Lake near Moberly.

Jessie L. Brewer 1903, age 93, of Pasadena, Calif., died November 12, 1974. She had been in failing health for several years. Miss Brewer, formerly of Kirksville, taught in Reger and Nvinger before going to Watonga, Oklahoma, in 1907. Seven years later she went to Roswell, N.M., where she was a teacher and homesteader. Miss Brewer had made her home in Pasadena for many years. Surviving are a brother, **Basil Brewer 1901** of New Bedford, Mass., several nieces and one nephew.

Martin E. Rhode 1935 of Rt. 4, Pittsburg, Kansas, died suddenly in October of 1974. Mr. Rhode was athletic director and study hall supervisor at Pittsburg Sr. H. S. He joined the Pittsburg school system in 1947 and was head football coach for 14 years. He was named "Coach of the Year" for Kansas in 1954, the year his team won the state championship. Mr. Rhode's death occurred only a few days before Homecoming at NMSU. He and his wife had made reservations to attend the Homecoming Luncheon and the banquet honoring Don Faurot, Rhode's coach at NMSU.

Pearle Netherton 1913 of 1101 W. 75th, Kansas City, died Nov. 11, 1974, at a nursing home in Gallatin, Mo. Miss Netherton taught at the Linwood Elementary School and Humbolt H. S. in Kansas City for 40 years before her retirement in 1961. She was a member of the Alpha Chapter of Delta Kappa Gamma sorority, University Women's Club, Kansas City Teachers Club, NEA and the Retired Teachers Association. She was a member of the First Baptist Church and its Business and Professional Women's Class and Women's Missionary Society. Miss Netherton is survived by two sisters, Mrs. Irmadell C. Weekley of the home, and Mrs. Julia B. Daniels of Gallatin. Graveside services were held at the Masonic Cemetery, Gilman City, Mo.

Herbert H. Hartford 1931, age 64, died Dec. 5, 1974, at his home in Prairie Village, Kansas. He had been in failing health several months. Mr. Hartford is survived by his wife, Joyce, and by two brothers, W. E. Hartford of St. Louis and Donald Hartford of Independence. Funeral services were held in Kansas City with burial in the Liberty Memorial Cemetery at Warrensburg. Mr. Hartford had been a counselor for the Kansas City Board of Education for 17 years. Before that he had been a psychologist at the Veterans Hospital in Wadsworth, Kansas. He was a member of Sigma Tau Gamma, Phi Delta Kappa, the Episcopal Church and was a veteran of World War II.

Esther Haferkamp Hirst 1927 of St. Louis died November 9, 1974, in a St. Louis hospital. She had been ill for the past several years. She is survived by her husband, J. Lincoln Hirst, D.O., of 4644 Redfield Ct., St. Louis. Mrs. Hirst was for many years an active member of the Auxiliary to the St. Louis Osteopathic Association. She and Dr. Hirst were members of the NMSU Alumni Association.

Leroy H. Elam 1932, age 70, of McFall, Mo., died November 11, 1974. Mr. Elam spent 46 years as a teacher, starting in rural schools and serving as teacher, coach and supervisor. He was

county superintendent of schools for Gentry County during his career. Mr. Elam was a member of the McFall United Methodist Church, Havana Masonic Lodge and the McFall Lion's Club. Survivors include his wife, the former Ellen O. Daniel; one son, Leroy H. Elam, Jr., of Ft. Pierce, Fla.; and two daughters, Mrs. Marjorie Askew, Thurman, Iowa; and Mrs. Jo Ellen Kaminski, Reno, Nevada. Funeral services for Mr. Elam were held in Albany, with burial in McFall cemetery.

Ouida M. Noe 1938, age 60, of Bakersfield, Calif., died April 29, 1974, following a short illness. Funeral and burial services were held in Bakersfield. She is survived by her husband, Ralph L. Noe of Route 2, Box 37, Bakersfield, one daughter, three sisters and eight grandchildren. During her earlier years, Mrs. Noe was a teacher in Missouri for 14 years. Twenty-six years ago she moved to California, where she was a real estate broker for Centy 21, Noe's Real Estate. Mrs. Noe was a member of the Queen City Baptist Church, the Eastern Star, and several professional organizations.

Katheryn Jones Corrough 1927 of Berkeley, Calif., died May 15, 1973. Mrs. Corrough was a kindergarten teacher for a number of years after her graduation from college. She is survived by two daughters, Anne Corrough McKee and Katheryn Corrough Katz. Mrs. Corrough was a life member of the NMSU Alumni Association.
